NOTICE OF PUBLIC HEARING

concerning

TENTATIVE ORDER
WASTE DISCHARGE REQUIREMENTS ORDER R5-2026-XXXX
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM
PERMIT CA0079111
FOR
THE CITY OF SACRAMENTO COMBINED WASTEWATER
COLLECTION AND TREATMENT SYSTEM
SACRAMENTO COUNTY

Discharger and Tentative Order Information

The City of Sacramento (Discharger) is the owner and operator of the Combined Wastewater Collection and Treatment System (Facility). The Discharger owns and operates a combined sewer system (CSS) that conveys domestic and commercial wastewater and storm water runoff from approximately 7,500 acres (approximately 280 miles of sewer pipe) in downtown Sacramento, East Sacramento, and Land Park areas. The Discharger also owns and operates a separate sanitary sewer system that conveys domestic and commercial wastewater. Approximately 3,800 acres (approximately 78 miles of sewer pipe) of the separated sanitary sewer system surrounding the CSS to the north, east, and south, contribute flows to the CSS. This portion of the separated system is regulated under separate State Water Board Order No. 2022-0103-DWQ, Statewide General WDRs for Sanitary Sewer Systems.

Collection and transport of the combined sewage in the CSS is managed by four main facilities: Sumps 1/1A, Sumps 2/2A, the Pioneer Reservoir Treatment Plant, and the Combined Wastewater Treatment Plant (CWTP). The majority of flows from the CSS service area are routed to the Sacramento Area Sewer District's (SacSewer) EchoWater Resource Recovery Facility for treatment prior to discharge to the Sacramento River, except during large storm events. When rainfall causes flows at Sump 2A to exceed 60 million gallons per day (MGD), the excess flow is diverted to the CWTP and Pioneer Reservoir Treatment Plant first for storage, and then when storage capacities are depleted, for primary treatment including disinfection and discharge to the Sacramento River. Several remote storage facilities within the CSS are also used to minimize the potential for localized flooding. The population served is based on a total population of 535,000 estimated by the United States Census Bureau for the City of Sacramento. The combined sewer system provides sewer service to 20% of the geographic area. It is estimated based on census tract level data that the CSS services approximately 140,000 people.

Discharges from the Facility are currently regulated by Waste Discharge Requirements Order R5-2020-0039, issued by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 14 August 2020. An Order is proposed to renew the NPDES permit. The proposed Waste Discharge Requirements (NPDES Permit) regulate combined sewer overflow (CSO) discharges to the Sacramento River in accordance with the U.S. Environmental Protection Agency's CSO Control Policy. The proposed NPDES Permit requires continued implementation of the CSO Control Policy's Nine Minimum Controls and the Discharger's Long-Term Control Plan.
