Subject: comment on proposed settlement of R2-2011-0005

I am writing to urge that the settlement of complaint R2-2011-0005 include a Supplemental Environmental Project for Sausal Creek, to aid the restoration of the creek to the condition it was in before EBMUD damaged it with an unlawful discharge. This will assure citizens that the Regional Board understands and endorses a basic principle of fairness: that wrong-doers should mitigate, where practicable, the harm that their wrong-doing has caused. In addition, it will serve to remind EBMUD in the future that unlawful discharges may cause harm to sensitive natural environments and must be avoided.

Janet Broughton
