

SUPPLEMENTAL ITEM No. 6

STATE OF CALIFORNIA
CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION

MEETING DATE: March 9, 2011

DISCUSSION: This Supplemental report for Item No. 6 describes changes recommended to further clarify documents in the agenda package concerning PCBs Source Identification and Control. Additions are shown by underlined text, and deletions are shown by ~~striketrough~~ text.

I. Provision 4 starting on page 7 is proposed to read as follows:

“By February 28, 2012, and every year afterwards, each Discharger subject to PCBs effluent limitations of this Order shall evaluate and identify controllable sources of PCBs to its treatment system. These sources consist of (e.g., any PCBs contributions to wastewater from industrial equipment that contains PCBs, and any PCBs contributions to wastewater from buildings with PCB-containing sealants that are scheduled for remodeling or demolition and identified as pilot projects required by Provision C.12.b of the Municipal Regional Stormwater Permit Order No. R2-2009-0074.) ~~and~~ The Discharger shall implement measures in a timely manner to control such sources. Each Discharger shall submit the results of this evaluation, including any proposed control actions with an implementation schedule, in its annual pollution prevention reports required by its individual NPDES permit.”
