NOTICE: Tentative Order for General Waste Discharge Requirements, under the National Pollutant Discharge Elimination System (NPDES) No. CAG912002, for Discharge or Reuse of Extracted and Treated Groundwater Resulting from the Cleanup of Groundwater Polluted by Volatile Organic Compounds (VOC), Fuel Leaks, and Other Related Wastes and Rescission of Order No. R2-2006-0075

The Regional Water Board intends to consider the reissuance of this general NPDES permit during a meeting that will commence at the time and place indicated below:

DATE: February 8, 2012
TIME: 9:00 a.m.
PLACE: Auditorium, Elihu Harris State Building
1515 Clay Street, Oakland

A copy of the Tentative Order, Tentative Self-Monitoring Program, Fact Sheet, and Notice of Public Hearing are enclosed. Please submit any comments in writing by no later than **5:00 p.m., January 12, 2012**, to the attention of Farhad Azimzadeh. We will not consider or include comments received after this date when preparing the package presented to the Regional Water Board for its consideration. We will post our response to comments on our website one week prior to the hearing.

Note the following proposed significant changes:

- Dischargers currently covered under the VOC General Permit (CAG912003) must seek coverage by filing a notice of intent under this new VOC and Fuel General Permit after CAG912003 expires in 2014. We plan to discontinue CAG912003 after its expiration.
- The Tentative Order includes a discharge limitation for residual chlorine from the VOC General Permit CAG912003 for those dischargers that use chlorine to treat extracted groundwater. Other limits remain the same as the current separate Fuel General Permit and VOC General Permit.
- The Tentative Order includes revised NOI and notice of termination forms.

If you have any questions regarding this letter, please contact Farhad Azimzadeh at (510) 622-2310 or E-mail at fazimzadeh@waterboards.ca.gov.

Sincerely,

Lila Tang
Chief, NPDES Wastewater Division
