

STATE OF CALIFORNIA
REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION

STAFF SUMMARY REPORT (Robert Schlipf)
MEETING DATE: January 18, 2012

ITEM: 9

SUBJECT: **City of Livermore, Livermore-Amador Valley Water Management Agency, East Bay Dischargers Authority (EBDA), City of Livermore Water Reclamation Plant and Associated Collection System, Livermore, Alameda County - Reissuance of NPDES Permit**

CHRONOLOGY: August 2006 – Permit Reissued

DISCUSSION: The Revised Tentative Order (Appendix A) would reissue the City's permit for the discharge of treated wastewater from its treatment plant into the EBDA system for ultimate discharge to Central San Francisco Bay. This item is to be considered at the same time as item 7 for EBDA as well as item 8 for the Dublin San Ramon Services District (DSRSD). The City's treatment plant is one of the six treatment plants that discharge through the EBDA outfall. Many of the requirements that would apply for the previous items would also apply in this permit. However, a separate permit is necessary because the City is not a member of EBDA.

Since the tentative orders for the City, DSRSD, and EBDA are nearly identical, the comments received and our responses apply to all three items. Additionally, the attached response to comments includes responses that apply to just the City's tentative order. All changes proposed are described in the Response to Comments (Appendix C) and reflected in the Revised Tentative Order.

We expect this item to be uncontested.

RECOMMEN-
DATION: Adopt the Revised Tentative Order

CIWQS Place ID: 237195 (RS)

APPENDICES:

- A – Revised Tentative Order
- B – Comments
- C – Response to Comments
