

**California Regional Water Quality Control Board
San Francisco Bay Region**

RESPONSE TO WRITTEN COMMENT

On the Tentative Order for
Livermore-Amador Valley Water Management Agency Export and Storage Facilities
Intermittent Wet Weather Discharge

The Regional Water Board received a written comment from the Livermore-Amador Valley Water Management Agency (LAVWMA) on a tentative order distributed for public comment. The comment is summarized below in *italics* (paraphrased for brevity) and followed by a staff response. For the full content and context of the comment, please refer to the comment letter. To request a copy of the comment letter, see the contact information provided in Fact Sheet section 8.7 of the Revised Tentative Order.

Revisions are shown with ~~striketrough~~ for deletions and underline for additions.

***Comment:** LAVWMA requests we modify the description for planned changes at the San Leandro Sample Station. While the District intends for the upgrades to eliminate the need to send personnel to the sample station during extreme wet weather, it acknowledges that this may be infeasible.*

Response

We agree and revised Fact Sheet section 2.6 as follows:

Planned Changes. During this Order term, the Discharger plans to upgrade the San Leandro Sample Station (Monitoring Location M-001) to allow remote operation. This will ~~eliminate~~ reduce the need to send personnel to the sample station during extreme wet weather.
