

# TABLE OF CONTENTS

<b>CHAPTER 1: INTRODUCTION .....</b>	<b>1</b>
1.1 The San Francisco Bay Region.....	1
1.2 The Bay System's Surface and Ground Waters .....	1
1.3 The Regional Board.....	2
1.4 Water Quality Control Plan.....	3
1.5 Watershed Management Planning .....	4
1.6 The San Francisco Estuary Project.....	5
<b>CHAPTER 2: BENEFICIAL USES .....</b>	<b>9</b>
2.1 Definitions of Beneficial Uses.....	9
2.1.1 Agricultural Supply (AGR).....	9
2.1.2 Areas of Special Biological Significance (ABS) .....	9
2.1.3 Cold Freshwater Habitat (COLD).....	10
2.1.4 Ocean, Commercial, and Sport Fishing (COMM) .....	10
2.1.5 Estuarine Habitat (EST).....	10
2.1.6 Freshwater Replenishment (FRESH).....	10
2.1.7 Groundwater Recharge (GWR).....	10
2.1.8 Industrial Service Supply (IND).....	11
2.1.9 Marine Habitat (MAR).....	11
2.1.10 Fish Migration (MIGR) .....	11
2.1.11 Municipal and Domestic Supply (MUN).....	12
2.1.12 Navigation (NAV).....	12
2.1.13 Industrial Process Supply (PROC).....	12
2.1.14 Preservation of Rare and Endangered Species (RARE) .....	13
2.1.15 Water Contact Recreation (REC1).....	13
2.1.16 Noncontact Water Recreation (REC2) .....	13
2.1.17 Shellfish Harvesting (SHELL).....	14
2.1.18 Fish Spawning (SPWN).....	14

2.1.19	Warm Freshwater Habitat (WARM)	14
2.1.20	Wildlife Habitat (WILD)	14
2.2	Present and Potential Beneficial Uses	15
2.2.1	Surface Waters	15
2.2.2	Groundwaters	16
2.2.3	Wetlands	17
<b>CHAPTER 3: WATER QUALITY OBJECTIVES</b>		<b>55</b>
3.1	Water Quality Objectives	55
3.2	Objectives for Ocean Waters	57
3.3	Objectives for Surface Waters	57
3.3.1	Bacteria	57
3.3.2	Bioaccumulation	57
3.3.3	Biostimulatory Substances	57
3.3.4	Color	57
3.3.5	Dissolved Oxygen	57
3.3.6	Floating Material	58
3.3.7	Oil and Grease	58
3.3.8	Population and Community Ecology	58
3.3.9	pH	58
3.3.10	Radioactivity	59
3.3.11	Salinity	59
3.3.12	Sediment	59
3.3.13	Settleable Material	59
3.3.14	Suspended Material	59
3.3.15	Sulfide	59
3.3.16	Tastes and Odors	60
3.3.17	Temperature	60
3.3.18	Toxicity	60

3.3.19	Turbidity .....	61
3.3.20	Un-ionized Ammonia .....	61
3.3.21	Objectives for Specific Chemical Constituents.....	61
3.3.22	Constituents of Concern for Municipal and Agricultural Water Supplies .....	62
3.4	Objectives for Groundwater .....	62
3.4.1	Bacteria.....	63
3.4.2	Organic and Inorganic Chemical Constituents.....	63
3.4.3	Radioactivity .....	64
3.4.4	Taste and Odor .....	64
3.5	Objectives for the Delta and Suisun Marsh.....	64
3.6	Objectives for Alameda Creek Watershed .....	64
<b>CHAPTER 4: IMPLEMENTATION PLAN.....</b>		<b>77</b>
4.1	The Watershed Management Approach.....	77
4.1.1	Water Quality Attainment Strategies Including Total Maximum Daily Loads .....	78
4.1.2	Toxic Pollutant Management in the Estuary .....	79
4.1.2.1	Numeric Water Quality Objectives: Wasteload Allocations .....	79
4.1.2.2	Toxic Pollutant Accumulation: Mass-Based Strategies .....	80
4.1.2.3	Scientific Research: Ongoing Refinement of Programs.....	80
4.1.2.4	Riverine Flows, System Flushing, and Pollutant Loading.....	81
4.1.2.4.1	Delta Outflow .....	81
4.1.2.4.2	San Luis Drain .....	81
4.1.3	Watershed Management in Countywide Programs and Individual Watersheds.....	82
4.1.3.1	The Napa River Watershed .....	82
4.1.3.2	The Santa Clara Basin Watershed Management Initiative .....	83
4.1.3.3	The Tomales Bay Watershed.....	83
4.1.3.4	The Contra Costa Watershed Forum .....	83
4.2	Discharge Prohibitions Applicable Throughout the Region .....	84

4.2.1	Summary.....	85
4.3	Point Source Control.....	85
4.4	Waste Discharge Permitting Program .....	86
4.5	Effluent Limitations .....	86
4.5.1	Technology- and Water Quality-Based Limitations.....	86
4.5.2	Site-Specific Objectives .....	87
4.5.3	Best Professional Judgment .....	87
4.5.4	Discharges to Ocean Waters .....	88
4.5.5	Discharges to Inland Surface Waters, Enclosed Bays, and Estuaries .....	88
4.5.5.1	Limitations for Conventional Pollutants.....	88
4.5.5.2	Limitations for Selected Toxic Pollutants.....	88
4.5.5.3	Whole Effluent Toxicity Limits and Control Program.....	89
4.5.5.3.1	Acute Toxicity .....	89
4.5.5.3.2	Chronic Toxicity .....	90
4.5.5.3.3	Toxicity Identification / Reduction Evaluation.....	90
4.5.5.3.4	Effluent Toxic Characterization Program.....	91
4.6	Calculation of Water Quality-Based Effluent Limitations .....	92
4.6.1	Dilution Ratios .....	92
4.6.1.1	Deep Water Discharges.....	92
4.6.1.2	Shallow Water Discharges.....	93
4.6.2	Fresh Water vs. Marine Water .....	94
4.6.3	Background Concentrations .....	94
4.7	Implementation of Effluent Limitations .....	95
4.7.1	Performance-Based Limits .....	95
4.7.2	Site-Specific Objective Incorporation .....	95
4.7.3	Averaging Periods.....	95
4.7.4	Method Detection Limits, Practical Quantitation Levels (PQL), and Limits of Quantification (LOQ).....	95
4.7.5	Selection of Parameters.....	96

4.7.6	Compliance Schedules.....	96
4.8	Stormwater Discharges .....	97
4.9	Wet Weather Overflows.....	98
4.9.1	Federal Combined Sewer Overflow Control Policy.....	98
4.9.2	Conceptual Approach.....	99
4.9.3	Surface Impoundment Overflow Protection .....	100
4.10	Discharge of Treated Groundwater .....	101
4.11	Municipal Facilities.....	102
4.11.1	City and County of San Francisco.....	102
4.11.2	South Bay Municipal Dischargers (San Jose/Santa Clara, Palo Alto, and Sunnyvale).....	103
4.11.3	Fairfield-Suisun Sewer District (FSSD) .....	103
4.11.4	Livermore-Amador Valley .....	104
4.11.4.1	Salt Management in the Livermore-Amador Valley.....	104
4.11.4.2	Water Recycling and Valley Water-Wastewater Management .....	105
4.11.4.3	Valley-wide Salt Management Plan .....	106
4.11.4.4	General Water Reuse Permit .....	107
4.11.4.5	Water Board Support for Water Quality Management Strategies Protecting the Livermore-Amador Valley Groundwater Basin.....	107
4.11.5	East Bay Municipal Utility District (EBMUD) and Local Agencies .....	108
4.12	Industrial Facilities.....	109
4.13	Pretreatment and Pollution Prevention.....	110
4.13.1	California Pretreatment Program.....	110
4.13.2	Pollution Prevention .....	111
4.13.2.1	General Pollution Prevention Programs .....	112
4.13.2.2	Pollution Prevention Program History.....	112
4.13.2.3	General Pollution Prevention Programs for POTWs.....	112
4.13.2.4	Targeted Pollution Prevention Programs for POTWs.....	113
4.13.2.5	Direct Industrial Discharger Pollution Prevention Program .....	114
4.14	Urban Runoff Management.....	115

4.14.1	Management of Pollutant Discharge From Storm Drains .....	116
4.14.1.1	Baseline Control Program.....	116
4.14.1.2	Comprehensive Control Program .....	118
4.14.2	Highway Runoff Control Program.....	119
4.14.3	Industrial Activity Control Program .....	119
4.14.3.1	Tier I: General Permitting.....	120
4.14.3.2	Tier II: Specific Watershed Permitting.....	120
4.14.3.3	Tier III: Industry-Specific Permitting .....	120
4.14.3.4	Tier IV: Facility-Specific Permitting .....	120
4.14.4	Construction Activity Control Program .....	121
4.15	Agricultural Wastewater Management .....	121
4.15.1	Animal Confinement Operations.....	121
4.15.1.1	Dairy Waste Management.....	122
4.15.1.2	Dairy Waste Regulation.....	122
4.15.2	Irrigation Operations .....	124
4.16	Water Recycling .....	124
4.16.1	Water Recycling and Reuse Program.....	125
4.16.2	Interagency Water Recycling Program and Coordination.....	126
4.17	Municipal Wastewater Sludge Management.....	127
4.18	On-Site Wastewater Treatment and Dispersal Systems.....	128
4.18.1	Policy on Discrete Sewerage Facilities .....	128
4.18.2	On-Site System Guidelines.....	129
4.18.3	Alternative On-Site Systems .....	129
4.18.4	Graywater Systems .....	131
4.19	Erosion and Sediment Control.....	131
4.20	Dredging and Disposal of Dredged Sediment.....	134
4.20.1	Regulatory Framework.....	134
4.20.2	Environmental Impacts of Dredging and Disposal in the Aquatic Environment.....	135

4.20.3	Dredging Study Programs .....	136
4.20.3.1	Dredging Management Program .....	136
4.20.3.2	Long-Term Management Strategy (LTMS).....	136
4.20.3.3	The LTMS Process.....	136
4.20.3.4	Ocean Studies .....	137
4.20.3.5	In-Bay Studies.....	137
4.20.3.6	Upland and Non-tidal/Reuse Studies.....	138
4.20.4	Wetland Restoration Using Dredged Material .....	138
4.20.4.1	Sonoma Baylands.....	138
4.20.4.2	Montezuma Wetlands Restoration Project.....	139
4.20.5	Water Board Policies on Dredging and Dredged Sediment Disposal .....	139
4.20.5.1	Need for Regional and Local Monitoring .....	139
4.20.5.2	Material Disposal Restriction.....	139
4.20.5.3	Volume Targets .....	139
4.20.5.4	Volume Target Implementation .....	139
4.20.5.5	Use of Testing Guidelines.....	140
4.20.5.6	Applicability of Waste Discharge Requirements .....	140
4.20.5.7	Dredging Windows .....	140
4.20.5.8	Impacts at Dredge Site .....	141
4.20.5.9	Policy on Land and Ocean Disposal .....	141
4.20.5.10	Policy on Dredged Material Disposal Permit Coordination .....	141
4.20.5.11	Current Corps of Engineers Policy on Volume of Material Disposed of at the Alcatraz Disposal Site .....	141
4.21	Mines and Mineral Producers.....	142
4.21.1	Inactive Sites.....	142
4.21.2	Active Sites .....	143
4.21.3	Mining Program Goal.....	144
4.21.4	Mining Program Description.....	144
4.22	Vessel Wastes.....	144

4.23	Wetland Protection and Management .....	145
4.23.1	Baylands Ecosystem Habitat Goals .....	146
4.23.2	Determination of Applicable Beneficial Uses for Wetlands.....	146
4.23.3	Hydrology .....	147
4.23.4	Wetland Fill .....	147
4.24	Oil Spills .....	148
4.25	Groundwater Protection and Management .....	149
4.25.1	Application of Water Quality Objectives.....	150
4.25.2	Requirements for Site Investigation, Cleanup and Site Closure .....	151
4.25.2.1	State Water Board Policies for Groundwater Cleanup .....	151
4.25.2.2	Elements of Groundwater Cleanup and Site Closure .....	153
4.25.2.3	Setting Cleanup Levels.....	154
	Groundwater Cleanup Levels .....	155
	Soil Cleanup Levels.....	156
4.25.3	Program Areas .....	156
4.25.3.1	Spills, Leaks, Investigation, and Clean-up Program (SLIC) .....	156
4.25.3.2	Underground Storage Tank Program.....	161
4.25.3.3	Landfill Program.....	164
4.25.3.4	Department of Defense and Department of Energy Program .....	167
4.25.3.5	Aboveground Petroleum Storage Act.....	169
4.25.4	Groundwater Protection Studies.....	169
4.25.4.1	Groundwater Protection and Beneficial Use Studies .....	169
4.25.4.2	State Board Groundwater Protection Planning Contract .....	170
4.25.4.3	Integrated Environmental Management Project.....	170
4.25.4.4	Groundwater Resource Study.....	170
4.25.4.5	Shallow Drainage Wells.....	170
4.26	Emerging Program Areas .....	172
4.26.1	Wetland Restoration .....	172
4.26.2	Desalination.....	173

4.26.3	Emerging Toxic Pollutants of Concern .....	174
4.26.4	Groundwater Protection Issues .....	174
4.26.4.1	Vertical Conduits .....	174
4.26.4.2	Horizontal Conduits / Sanitary Sewer Leaks to Groundwater .....	175
4.26.4.3	Groundwater Surface Water Interactions .....	175
4.26.4.4	Saltwater Intrusion .....	175
4.26.4.5	Tracking Institutional Controls.....	176
4.26.5	Sediment .....	176
4.26.6	National "Portfields" Initiative .....	176
4.26.7	Hydromodification.....	176
<b>CHAPTER 5: PLANS AND POLICIES.....</b>		<b>207</b>
5.1	State Water Board Plans and Policies.....	207
5.2	Water Board Plans and Policies .....	211
5.2.1	Cooperative Agreements.....	212
5.2.2	Regional Monitoring, Data Use, and the Aquatic Habitat Program.....	213
5.2.3	Discharger Reporting and Responsibilities .....	214
5.2.4	Delta Planning .....	214
5.2.5	Dredging.....	215
5.2.6	Nonpoint Source Pollution .....	215
5.2.7	On-Site Waste Dispersal and Waste Discharge.....	216
5.2.8	Shellfish.....	218
5.2.9	Vessel Wastes .....	218
5.2.10	Water Recycling.....	219
5.2.11	Wetlands .....	219
5.2.12	Groundwater.....	220
<b>CHAPTER 6: SURVEILLANCE AND MONITORING.....</b>		<b>221</b>
6.1	Regional Monitoring Program .....	221
6.2	Surface Water Ambient Monitoring Program .....	222

6.3	Sacramento-San Joaquin Rivers and Northern San Francisco Bay Estuary Water Quality Surveillance .....	223
6.4	Groundwater Monitoring Networks.....	223
6.5	Compliance Monitoring.....	224
6.6	Complaint Investigation .....	225
6.7	Biennial Water Quality Inventory .....	225
6.8	Other Monitoring Programs.....	225

**CHAPTER 7: WATER QUALITY ATTAINMENT STRATEGIES INCLUDING TOTAL MAXIMUM DAILY LOADS..... 237**

7.1	A Water Quality Attainment Strategy to Support Copper and Nickel Site-Specific Objectives South of the Dumbarton Bridge .....	237
7.1.1	Background .....	237
7.1.1.1	Sources.....	238
7.1.1.2	Stakeholder Involvement.....	238
7.1.2	Overview of the TMDL Project for Copper and Nickel in Lower South Bay...239	
7.1.3	Impairment Assessment and Site-Specific Objectives .....	239
7.1.4	Implementation Plan.....	240
7.1.4.1	Monitoring Program.....	240
7.1.4.2	Trigger Values .....	241
7.1.4.3	Baseline Actions .....	242
7.1.4.4	Phase I Actions .....	243
7.1.4.5	Phase II Actions.....	244
7.1.4.6	Metal Translators Applicable to Lower South Bay Municipal Wastewater Dischargers .....	244
7.2	Tomales Bay Watershed Pathogens TMDL.....	245
7.2.1	Problem Statement .....	246
7.2.2	Sources .....	246
7.2.3	Numeric Targets.....	247
7.2.4	Total Maximum Daily Load.....	247

7.2.5	Load Allocations.....	248
7.2.6	Implementation Plan.....	248
7.2.6.1	Agricultural Water Quality Control Program Costs .....	249
7.2.6.2	Evaluation and Monitoring.....	249
7.2.6.3	Adaptive Implementation .....	250
7.3	Water Quality Attainment Strategy and TMDL for Diazinon and Pesticide-Related Toxicity in Urban Creeks .....	251
7.3.1	Problem Statement .....	251
7.3.2	Numeric Targets.....	252
7.3.2.1	Pesticide-Related Toxicity .....	252
7.3.2.2	Diazinon .....	252
7.3.3	Sources .....	253
7.3.4	Total Maximum Daily Load.....	253
7.3.5	Allocations.....	253
7.3.6	Implementation .....	253
7.3.6.1	Water Board Actions .....	254
7.3.6.2	U.S. Environmental Protection Agency Actions .....	255
7.3.6.3	California Department of Pesticide Regulation Actions .....	255
7.3.6.4	Collaboration Within the California Environmental Protection Agency ...	257
7.3.6.5	County Agricultural Commissioners Actions .....	258
7.3.6.6	Structural Pest Control Board Actions.....	258
7.3.6.7	University of California Actions.....	259
7.3.6.8	Urban Runoff Management Agencies and Similar Entities Actions .....	259
7.3.6.9	Private Entities Actions.....	261
7.3.7	Monitoring .....	261
7.3.7.1	Monitoring Requirements .....	262
7.3.7.2	Monitoring Benchmarks .....	263
7.3.8	Adaptive Implementation.....	263
7.3.8.1	Periodic Review .....	264

7.3.8.2	Additional Sources .....	264
7.3.8.3	Critical Data Needs.....	264

**LIST OF FIGURES**

Figure 1-1:	San Francisco Bay Basin .....	7
