CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SANTA ANA BASIN REGION

ORDER R8-2024-0059

WASTE DISCHARGE REQUIREMENTS
FOR
DISCHARGES OF DREDGED OR FILL MATERIALS TO WATERS OF THE STATE
TRACT 24067
RIVERSIDE COUNTY

FINDINGS

The Santa Ana Regional Water Quality Control Board (Santa Ana Water Board) hereby finds as follows:

1. This Order prescribes Waste Discharge Requirements (WDRs) for the Tract 24067 Project (Project) of Arcon Homes, Inc. (Discharger).
2. Receiving waters and groundwater potentially impacted by this Project are protected in accordance with the operative Water Quality Control Plan for the Santa Ana River Basin (Basin Plan) and all other pertinent plans and policies. The Basin Plan includes water quality standards, which consist of existing and potential beneficial uses of waters of the state, water quality objectives to protect those uses, and the state and federal antidegradation policies.
3. The Santa Ana Water Board has the authority to regulate the discharge of dredged and fill materials by prescribing WDRs pursuant to Water Code section 13263. The Santa Ana Water Board has determined that WDRs are necessary to adequately address the Project's potential impacts on the beneficial uses of waters of the state.
4. On May 5, 2020, the Discharger, submitted an *Application for Discharges of Dredged or Fill Material to Waters of the State* (Application) for the Project, which was assigned Santa Ana Water Board WDID No. 332020-17.
5. The Application was deemed complete on January 30, 2023.

Project Description and Discharge Characteristics

6. The Project site consist of a total of 19.5 acres. The Project activities include the construction of 82 single-family residential dwelling units on 17.1 acres. A total of 2.4 acres on the southeastern corner of the Project site will be avoided to protect the onsite drainage features in that area.

7. The Project is located within the City of Hemet in Riverside County and encompasses approximately 19.5 acres (Assessor Parcel Number 464-020-006 and 464-020-008; Latitude 33.71840° N, Longitude -116.99004° W). The Project site is east of the Seven Hills Golf Course, west of the extension of Lyon Street, and north of Salt Creek channel. Maps showing the Project location are found in Attachment A of this Order.
8. The Project site is currently undeveloped with no existing structures. It is dominated by disturbed non-native grassland and Riversidean sage scrub. The surrounding land uses include undeveloped land to the south and east, and single-family residences and a golf course to the north and west.
9. The Project site contains four ephemeral drainages identified as Drainages A, B, C, and D. Drainages A, B, C, and D are ephemeral drainages that flow for less than three (3) months per year. These features only convey surface flows directly following a storm event. Table 1 contains a summary of the waters of the state onsite.

Table 1: Summary of Waters of the State On-Site

Drainage ID	Waters of the State (acres)	Length (linear feet)
A	0.284	1,639
B	0.29	620
C	0.411	705
D	0.091	407
Total	0.985	2,964

10. Drainage A enters the Project site near the middle of the eastern boundary and flows for approximately 1,639 feet before converging with Drainage B.
11. Drainage B is part of the McSweeny Earth Channel. Drainage B enters the Project site near the southern portion of the eastern boundary and flows for approximately 620 feet before exiting the development parcel through the middle

of the southern boundary before exiting through the middle of the western boundary.

12. Drainage C enters the Project site through its eastern boundary and flows for approximately 705 feet before converging with Drainage B. The banks of Drainage C are vertically incised and up to six (6) feet deep, and the substrate is composed of coarse sand with gravel and cobbles.
13. Drainage D originates on-site and flows for approximately 407 feet before converging with Drainage B. Drainage D is an upland swale feature with a noticeable change in vegetation cover. The vegetation community changes from grassland in the surrounding uplands to a stand of California buckwheat scrub within the 10-foot-wide swale.
14. The implementation of the Project will result in the permanent physical loss of 0.445 acre of ephemeral streambed. The permanent impacts to waters of the state are a result of mass grading for the residential development. Additionally, a total of 0.23 acre of waters of the state will be temporarily impacted associated with realignment activities to allow for the construction of the residential development. The areas temporarily impacted will be restored to pre-existing conditions and allowed to return to a natural state.
15. The Discharger will avoid impacts to Drainage C and a portion of Drainage B. Table 2 below summarizes the Project impacts to waters of the state.

Table 2: Impacts to Waters of the State

Drainage ID	Permanent Impacts (acre)	Temporary Impacts (acre)	Length (linear feet)	Avoided Impacts (acres)
A	0.274	0.10	1,639	0
B	0.09	0.13	620	0.07
C	0	0	0	0.411
D	0.091	0	407	0
Total	0.445	0.23	2,666	0.481

16. The on-site drainages (Drainages A-D) flow into Railroad Canyon Reservoir (Canyon Lake) approximately 16 miles from the Project area and exhibit both physical surface channel connectivity and hydrologic connectivity with Railroad Canyon Reservoir (Canyon Lake). Canyon Lake has the following designated beneficial uses (existing or potential): Municipal and Domestic Supply, Agriculture Supply, Groundwater Recharge, Water Contact Recreation, Non-contact Water Recreation, Commercial and Sportfishing, Warm Freshwater Habitat, and Wildlife Habitat.
17. The Discharger has proposed to provide compensatory mitigation for permanent impacts to waters of the state through the following options:
 - a. Habitat Establishment/Re-establishment – Offsite (Mitigation Site), or
 - b. Habitat Rehabilitation/Re-establishment – Offsite (Mitigation Bank)

Regulatory Considerations

18. This Order is adopted pursuant to Water Code section 13263, subdivision (a), which provides that the Santa Ana Water Board may, after any necessary hearing, prescribe requirements (WDRs) as to the nature of any proposed discharge with relation to the conditions existing in the disposal area or receiving waters upon, or into which, the discharge is made or proposed. The WDRs are required to implement any relevant water quality control plans that have been adopted and take into consideration the beneficial uses to be protected, the water quality objectives reasonably required for that purpose, other waste discharges, the need to prevent nuisance, and the provisions of Water Code section 13241.
19. This Order is also adopted pursuant to Water Code section 13267, subdivision (b)(1) which authorizes the Santa Ana Water Board to require technical and monitoring program reports, submitted under penalty of perjury, from persons discharging or proposing to discharge waste within the Santa Ana Region, in connection with the issuance of WDRs. This Order incorporates requirements for water quality monitoring and Project reporting, which are necessary to ensure that the discharge of dredged and fill material complies with WDRs and is protective of the water quality. In accordance with Water Code section 13267, the burden, including costs, of generating these reports bears a reasonable relationship to the need for the report and the benefits to be obtained from them.
20. The Santa Ana Water Board has considered the federal and state antidegradation policies (State Water Board Resolution 68-16 and 40 C.F.R § 131.12) and finds that the discharge permitted under this Order is consistent with those policies. Filling wetlands, riparian areas, headwaters, and other waters

causes partial or complete loss of the beneficial uses provided by those waters. This Order requires that impacts to waters of the state be mitigated through avoidance and minimization to the maximum extent practicable and that unavoidable loss of beneficial uses is offset with compensatory mitigation, including the restoration (reestablishment or rehabilitation), establishment (creation), enhancement, and/or preservation of other waters of the state.

21. This Order is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to Water Code section 13330 and California Code of Regulations, title 23, section 2050 et seq. Additionally, the Santa Ana Water Board reserves the right to suspend, cancel, or modify and reissue this Order, after providing notice to the Discharger, if the Santa Ana Water Board determines that the Project fails to comply with any of the conditions of this Order; or when necessary to implement any new or revised water quality standards and implementation plans adopted or approved pursuant to the Porter-Cologne Water Quality Control Act (Wat. Code, § 13000 et seq.)
22. The provisions of this Order are severable and, if any provision of this Order or the application of any provisions of this Order to any circumstance is held invalid, the application of such provision to other circumstances and the remainder of this Order shall not be affected thereby.
23. A request for modification, revocation and re-issuance, or termination of this Order or a notification of planned changes or anticipated noncompliance does not stay any requirements of this Order.
24. The requirements prescribed herein do not authorize the commission of any act causing injury to the property of another, nor protect the Discharger from liabilities under federal, state, or local laws, nor guarantee the Discharger a capacity right in the receiving waters.
25. This Order does not convey any property rights of any sort, or any exclusive privilege. The ability to discharge waste is a privilege, not a right; nothing in this Order shall create a vested right to continue any discharges authorized herein, which are subject to rescission or modification. (Wat. Code, § 13263, subd. (g).)

CEQA and Public Participation

26. On November 23, 1999, the City of Hemet, as the lead agency under the California Environmental Protection Act (CEQA; Pub Resources Code, § 21000 et seq.) conducted an Initial Study and adopted a Mitigated Negative Declaration (MND) for the Project.
27. The Santa Ana Water Board is a responsible agency under CEQA for the purposes of issuing this Order. As a responsible agency, the Santa Ana Water Board is “responsible for considering only the effects of those activities involved

in a project which it is required by law to carry out or approve.” (Public Resources Code, § 21002.1, subd. (d).) In approving this Order, the Santa Ana Water Board has considered the MND adopted by the City of Hemet and subsequent information provided by the Discharger. More specifically, the Santa Ana Water Board considered those sections of the MND pertaining to impacts to water quality. The Santa Ana Water Board finds that compliance with the mitigation measures of the MND and conditions in this Order will reduce potentially adverse impacts to water quality to a less than significant level and protect beneficial uses of receiving waters.

28. The Santa Ana Water Board has notified the Discharger and other interested agencies and persons of its intent to prescribe WDRs for the discharge and has provided them with an opportunity for public hearing to submit comments. There are no known tribal and/or disadvantaged communities in the vicinity of the Project site.
29. The Santa Ana Water Board, in a public meeting, heard and considered all comments pertaining to the WDRs for the discharge.

REQUIREMENTS

IT IS HEREBY ORDERED, pursuant to Water Code sections 13263 and 13267, that the Discharger shall comply with the following:

A. Discharge Specifications

1. No activities associated with the Project shall cause or threaten to cause a condition of nuisance, contamination or pollution as defined in Water Code section 13050.
2. The groundwater in the vicinity of the Project shall not be degraded resulting from the Project activities or placement of fill materials for the Project.
3. The Discharger shall obtain coverage under and comply with the NPDES *General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities, State Water Board Order 2022-0057-DWQ*; NPDES No. CAS000002 (Construction General Permit) and subsequent amendments thereto. If the Project construction activities do not require coverage under the Construction General Permit, the Discharger shall develop and implement a runoff management plan or equivalent construction best management practices (BMP) plan, to prevent the discharge of sediment and other pollutants during construction activities.

4. The Discharger shall comply with the local regulations associated with the Santa Ana Water Board's Municipal Stormwater Permit issued to Riverside County and co-permittees under NPDES No. CAS618033 and WDRs Order R8-2010-0033 and subsequent iterations thereof.
5. If construction dewatering discharges, including temporary stream diversions, are necessary to carry out the Project, the Discharger shall enroll and comply with the Santa Ana Water Board Order R8-2020-0006, *General Waste Discharge Requirements for Discharges to Surface Waters that Pose an Insignificant (De Minimis) Threat to Water Quality*.
6. Discharges of fill materials shall be limited to the placement of native fill and "inert waste", as defined in California Code of Regulations, title 27, section 20230. Fill material other than native soil shall not be discharged as part of the project.
7. Construction and post-construction best management practices (BMPs) shall be implemented.

B. Discharge Prohibitions

1. The permanent impacts to waters of the state from the Project shall not exceed quantities identified in Table 2.
2. Except as expressly authorized in another WDRs order, waste shall not be discharged in a manner or location other than as described in the Application referenced in Table 2 of this Order.
3. Except for authorized fill material discharges to waters of the state, the direct discharge of wastes, including rubbish, refuse, bark, sawdust, or any other solid or liquid wastes, into water channels, surface waters, or any place where they would contact or be eventually transported to surface waters, including flood plains, is prohibited.
4. The discharge of oil or other floating materials from any activity in quantities sufficient to cause deleterious bottom deposits, turbidity, or discoloration in surface waters is prohibited.
5. The discharge of silt, sand, clay, or other earthen materials from any activity in quantities sufficient to cause deleterious bottom deposits, turbidity, or discoloration in surface waters is prohibited.
6. Discharges to surface waters of wastes or pollutants that are not authorized by this Order or regulated by a separate permit are prohibited.

7. During the grading and filling operation, there shall be no onsite fueling, lubrication, changing of oil or other equipment fluids and their filters, or any other maintenance or storage of construction equipment within or next to drainage areas or other surface runoff conveyances.

C. Mitigation Requirements

1. The Discharger shall provide compensatory mitigation for the authorized permanent impacts to waters of the state through one of the following options.
 - a. **Option 1: Permittee-Responsible Habitat Establishment/ Re-establishment – Off-site (Mitigation Site).** The Discharger shall compensate for permanent impacts to 0.455 acre to stream bed, bank, and channel, through the acquisition, and perpetual conservation, and management of a “Mitigation Site”, or several mitigation sites, containing no less than 1.785 acres of streambed and stream-associated habitat within the Santa Ana River Watershed in Riverside County.
 - b. **Option 2: Habitat Rehabilitation/Re-establishment – Offsite (Mitigation Bank).** The Discharger shall compensate for the permanent impacts to 0.455 acre of stream bed, bank, and channel, through the acquisition of no less than 1.785 acres of re-establishment (0.595 acre) and rehabilitation (1.19 acres) mitigation credits through a Santa Ana Water Board approved mitigation bank within the Santa Ana River Watershed.
2. For Options 1 the Discharger shall obtain written approval from Santa Ana Water Board staff for the proposed Mitigation Site(s) with a minimum of 1.785 acres of offsite streambed and stream-associated habitat.
3. The Discharger shall provide a final compensatory mitigation plan for review and approval by the Santa Ana Water Board staff. The final compensatory mitigation plan shall include all plan elements as outlined in the *Dredge and Fill Procedures, Subpart J – Compensatory Mitigation for Losses of Aquatic Resources*. The impacts to waters of the state are not authorized and shall not occur until a final compensatory mitigation plan has been approved. Upon approval by Santa Ana Water Board staff, the Discharger shall implement the approved compensatory mitigation plan.
4. The Discharger is responsible for the permittee-responsible compensatory mitigation in perpetuity. However, the Discharger may transfer the compensatory mitigation requirements associated with long-term management when the following conditions have been met:

- a. Performance standards are met.
 - b. A transfer agreement to a third party has been approved by the Santa Ana Water Board.
 - i. A transfer agreement shall be submitted from an authorized representative of the third party (transferee) for acceptance by the Santa Ana Water Board. This agreement shall demonstrate acceptance and understanding of the responsibility to comply with and fully satisfy the required compensatory mitigation and long-term management conditions. Failure to comply with the mitigation conditions and associated requirements may subject the transferee to enforcement by the Santa Ana Water Board under Water Code section 13385, subdivision (a).
 - ii. Notification of transfer of responsibilities meeting the above condition must be provided to the Santa Ana Water Board. A draft transfer agreement is due to the Santa Ana Water Board no less than 30 days prior to the transfer of the mitigation responsibility. A final transfer agreement is due to the Santa Ana Water Board within 30 days of the completion of the transfer.
 - c. An endowment fund has been provided by the Discharger to the third party for management in perpetuity of the mitigation site.
 - d. A conservation easement, deed restriction, or other appropriate restrictive covenant for the mitigation site has been recorded and approved by the Santa Ana Water Board.
5. For Option 2, impacts to waters of the state are not authorized until the Discharger submits a copy of the of the compensatory mitigation purchase agreement. A copy of the full purchase agreement shall be provided to Santa Ana Water Board staff, no later than 30 days prior to the initiation of the Project activities.
 6. If the Discharger is unable to obtain the compensatory mitigation credits prior to initiation the Project activities, the Discharger shall implement Option 1.

D. Provisions

1. The Discharger shall maintain a copy of this Order at the Project site so that it is always available to site operating personnel. Key operating personnel shall be familiar with the Order's content.

2. The Discharger shall take all reasonable steps to minimize or prevent any discharge that has a reasonable likelihood of adversely affecting human health and the environment.
3. This Order is not transferable to any person without written approval by the Santa Ana Water Board's Executive Officer. Prior to any change in ownership, the Discharger shall notify the Santa Ana Water Board's Executive Officer in writing at least 30 days in advance. The notice shall include a written transfer agreement between the existing owner and the new owner. At a minimum, the transfer agreement shall contain a specific date for transfer of responsibility for compliance with this Order and an acknowledgment that the new owner or operator is liable for compliance with this Order from the date of transfer. The Santa Ana Water Board may require modification or revocation and reissuance of this Order to change the name of the Discharger and incorporate other requirements as may be necessary under the Water Code.
4. The reporting period is from January 1st to December 31st. The Permittee shall submit an Annual Report each year no later than January 31st for the previous reporting period if the Order's effective date is at least 90 days within the reporting period. Annual reporting shall continue until a *Notice of Project Complete Letter* is issued to the Permittee. The contents of the annual report shall include a construction summary, Project status and schedule (including ground disturbance, site clearing and grubbing, and site construction), and the implementation status of BMPs during the active discharge period. If the Project has not started, the Discharger shall provide an estimated start date and reasons for any expected delays.
5. The Discharger shall submit a *Commencement of Construction Report* at least seven days prior to start of initial ground-breaking activities.
6. The Discharger shall submit a *Request for Notice of Completion of Discharges Letter* following completion of active Project construction activities, including any required restoration and Discharger-responsible mitigation. This request shall be submitted to Santa Ana Water Board staff within 30 days following the completion of all Project construction activities. Upon acceptance of the request, Santa Ana Water Board staff will issue to the Discharger a *Notice of Completion of Discharges Letter*, which will end the active discharge period and, if appropriate, associated annual fees.
7. The Discharger shall submit a *Request for Notice of Project Complete Letter* when construction and any required post-construction monitoring is complete and no further Project activities will occur. This request shall be submitted to Santa Ana Water Board staff within 30 days following the completion of all Project activities. Upon approval of the request, Santa

Ana Water Board staff will issue to the Discharger a *Notice of Project Complete Letter* and prepare a draft order terminating this Order for approval by the Santa Ana Water Board. The *Notice of Project Complete Letter* will end the post-discharge monitoring period, and either the expiration or Board approval of the termination of this Order will end the associated annual fees.

8. The Discharger shall retain records of all monitoring information, including all calibration and maintenance records, copies of all reports required by this Order, and records of all data used to complete the application for this Order. Records shall be maintained for a minimum of five years from the date of the sample, measurement, report, or application. Records may be maintained electronically. This period may be extended during for any unresolved enforcement action or litigation regarding this discharge or when requested by the Santa Ana Water Board.
9. The Discharger shall report any noncompliance that may endanger human health or the environment. Information shall be provided orally to the Santa Ana Water Board office and the Office of Emergency Services within twenty-four (24) hours of when the Discharger becomes aware of the incident. If noncompliance occurs outside of business hours, the Discharger shall leave a message on the Santa Ana Water Board's office voicemail. A written report shall also be provided within five business days of the time when the Discharger becomes aware of the incident. The written report shall contain a description of the noncompliance and its cause, the period of noncompliance, the anticipated time to achieve full compliance, and the steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance. All other forms of noncompliance shall be reported with the Discharger's next scheduled Monitoring Report, or earlier if requested by the Executive Officer.
10. Before initiating a new discharge or making a material change in the character, location, or volume of an existing discharge, the Discharger shall report all pertinent information in writing to the Santa Ana Water Board, and if required by the Santa Ana Water Board, obtain revised requirements before any modifications are implemented.
11. The Discharger shall allow the Santa Ana Water Board, or an authorized representative, upon presentation of credentials and other documents as may be required by law to:
 - a. Enter premises where a regulated facility or activity is located or conducted, or where records are kept under the requirements of this Order;

- b. Access and copy any records that are kept under the requirements of this Order;
 - c. Inspect any facility, equipment (including monitoring and control equipment), practices, or operations regulated or required under this Order; and
 - d. Photograph, sample, or monitor for the purpose of assuring compliance with this Order or as otherwise authorized by the Water Code.
12. This Order becomes effective on the date of adoption by the Santa Ana Water Board.
13. This Order will remain valid for five years from the date of its adoption. The Discharger shall file a new dredge and fill application in accordance with California Code of Regulations, title 23, division 3, chapter 9 no later than 180 days in advance of this expiration date. The application, with filing fee, will be discussed between the Discharger and Santa Ana Water Board staff regarding any need for additional information and changes in fees prior to the issuance of new WDRs.

Attachment B—REPORTS and NOTIFICATIONS
Attachment C—SIGNATORY REQUIREMENTS

ENFORCEMENT

The Santa Ana Water Board reserves the right to take any enforcement action authorized by law. Accordingly, failure to timely comply with any provisions of this Order may subject the Discharger to enforcement action. Such actions include, but are not limited to, the assessment of administrative civil liability pursuant to Water Code sections 13323, 13268, and 13350, a Time Schedule Order (TSO) issued pursuant to Water Code sections 13300 and 13308, or referral to the California Attorney General for recovery of judicial civil liability.

ADMINISTRATIVE REVIEW

Any person aggrieved by this Santa Ana Water Board action may petition the State Water Board for review in accordance with Water Code section 13320 and California Code of Regulations, title 23, section 2050 et seq. To be timely, the petition must be received by the State Water Board by 5:00 pm on the 30th day after the date of this Order; if the 30th day falls on a Saturday, Sunday or state holiday, the petition must be

TENTATIVE ORDER R8-2024-0059
ARCON HOME, INC.
TRACT 24067

13

received by the State Water Board by 5:00 pm on the next business day. The law and regulations applicable to filing petitions are available on the [State Water Board website \(http://www.waterboards.ca.gov/public_notices/petitions/water_quality\)](http://www.waterboards.ca.gov/public_notices/petitions/water_quality). Copies will also be provided upon request.

ATTACHMENT B—REPORTS AND NOTIFICATIONS

Copies of this Form

To identify your Project, it is necessary to include a copy of the Project-specific Report and Notification Cover Sheet below with your report (see below). Please retain a copy for your records.

Report Submittal Instructions

- 1) Check the box on the *Report and Notification Cover Sheet* next to the report or notification you are submitting.
 - a) Part A (Annual Report): Submitted annually from the anniversary of the Project effective date until a *Notice of Project Complete Letter* is issued.
 - b) Part B (Project Status Notifications): Used to notify the Santa Ana Water Board of the status of the Project schedule that may affect Project billing.
- 2) Sign the *Report and Notification Cover Sheet* and attach all information requested for the Report Type.
- 3) Electronic Report Submittal Instructions:
 - a) Submit signed *Report and Notification Cover Sheet* and required information via email to: RB8-401Reporting@waterboards.ca.gov
 - b) Include in the subject line of the email: Order R8-2024-0059 and Report Type Name
 - c) Additionally, electronically submit Annual Reports using the State Water Board's California Integrated Water Quality System (CIWQS) Program website [California Integrated Water Quality System Project \(CIWQS\) | California State Water Resources Control Board](#). The CIWQS website will provide additional information for report submittal in the event there will be a planned service interruption for electronic submittal.

ATTACHMENT B—REPORTS AND NOTIFICATIONS**Definition of Reporting Terms**

- 1) **Active Discharge Period:** The active discharge period begins with the effective date of this Order and ends on the date that the Discharger receives a *Notice of Completion of Discharges Letter* or, if no post-construction monitoring is required, a *Notice of Project Complete Letter*. The Active Discharge Period includes all elements of the Project, including site construction and restoration, and any Discharger-responsible compensatory mitigation construction.
- 2) **Request for Notice of Completion of Discharges Letter:** This request by the Discharger to the Santa Ana Water Board staff pertains to projects that have post construction monitoring requirements (e.g., if site restoration were required to be monitored for five (5) years following construction). Santa Ana Water Board staff will review the request and send a *Completion of Discharges Letter* to the Discharger upon approval. This letter will initiate the post-discharge monitoring period and a change in fees from the annual active discharge fee to the annual post-discharge monitoring fee.
- 3) **Request for Notice of Project Complete Letter:** This request by the Discharger to the Santa Ana Water Board staff pertains to projects that either have completed post-construction monitoring and achieved performance standards, or have no post-construction monitoring requirements and no further Project activities are planned. Santa Ana Water Board staff will review the request and send a *Project Complete Letter* to the Discharger upon approval. Termination of annual invoicing of fees will correspond with the expiration or termination by Board action of this Order.

ATTACHMENT B—REPORTS AND NOTIFICATIONS**Map/Photo Documentation Information**

When submitting maps or photos, please use the following formats.

1. Map Format Information:

Preferred map formats of at least 1:24000 (1" = 2000') detail (listed in order of preference):

- **GIS shapefiles:** The shapefiles shall depict the boundaries of all Project areas and extent of aquatic resources impacted. Each shape should be attributed with the extent/type of aquatic resources impacted. Features and boundaries should be accurate to within 33 feet (10 meters). Identify datum/projection used and, if possible, provide map with a North American Datum of 1983 (NAD83) in the California Teale Albers projection in feet.
- **Google KML files** saved from Google Maps: My Maps or Google Earth Pro. Maps shall show the boundaries of all Project areas and extent/type of aquatic resources impacted. Include URL(s) of maps. If this format is used, include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.
- **Other electronic format** (CAD or illustration format) that provides a context for location (inclusion of landmarks, known structures, geographic coordinates, or USGS DRG or DOQQ). Maps shall show the boundaries of all Project areas and extent/type of aquatic resources impacted. If this format is used, include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.
- Aquatic resource maps marked on paper **USGS 7.5-minute topographic maps** or **Digital Orthophoto Quarter Quads (DOQQ)** printouts. Maps shall show the boundaries of all Project areas and extent/type of aquatic resources impacted. If this format is used, include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.

- 2. Photo-Documentation:** Include a unique identifier, date stamp, written description of photo details, and latitude/longitude (in decimal degrees) or map indicating location of photo. Successive photos should be taken from the same vantage point to compare pre/post-construction conditions.
