**Project Location:** 34.135904° N, -117.190229° W

**Project City and County:** Highland, San Bernardino

**Applicant Organization:** San Bernardino County Flood Control District

**Applicant Name:** Arlene Chun

**Waterboard Staff:** TBA

### **Brief Description of Project:**

Project Description: The purpose of this notification is to seek authorization for flood control activities related to wildfire mitigation, including wildfire protection, prevention, clean-up, and recovery efforts within existing flood control facilities. The proposed activities would be conducted on an as-needed basis within the eight (8) existing flood control activities, located in the City of Highland.

Project Activities: The work would be performed to the minimum extent necessary to restore the facility to its maintenance baseline. It is understood that a facility's maintenance baseline is the facility's as-built dimensions. As such, no loss waters of the United States will occur. Proposed flood control activities include, but are not limited to, the construction, maintenance, improvement, repair, rehabilitation, replacement, or removal of temporary and permanent access areas; temporary dewatering structures; sediment/debris management structures; damaged uplands; fire and/or fuel breaks; or flood control development structures, for the purpose of wildfire prevention, response, and recovery to protect life and property. Additionally, all proposed activities will utilize existing access roads.
