BACKGROUND

On October 17, 2017, the State Water Resources Control Board (State Water Board) adopted the Cannabis Cultivation Policy (Cannabis Policy) and General Waste Discharge Requirements and Waiver of Waste Discharge Requirements for Discharges of Waste Associated with Cannabis Cultivation Activities (Cannabis General Order). The Cannabis Policy and Cannabis General Order include requirements to reduce impacts of waste discharges and surface water diversions associated with cannabis cultivation. Cannabis cultivators will be able to enroll under the Cannabis General Order and obtain water rights under the Cannabis Small Irrigation Use Registration (SIUR) Program, if needed, using the online Cannabis General Order and SIUR Application Portal. The Cannabis SIUR Program is a streamlined option to obtain an appropriative water right to divert surface water to irrigate commercial cannabis crops.
