EXECUTIVE OFFICE

DATE: OCT 13 2009

SUBJECT: CLEAN WATER ACT (CWA) SECTION 401 WATER QUALITY
CERTIFICATION FOR THE DEPARTMENT OF FISH AND GAME 2009
FISHERIES RESTORATION GRANT PROGRAM SOUTHERN PROJECT
(File No. SB09004IN)

The Department of Fish and Game (DFG) has requested that the State Water Resources Control Board (State Water Board) issue a CWA section 401 Water Quality Certification (Certification) for the 2009 Fisheries Restoration Grant Program (FRGP). A complete application for Certification was received on June 25, 2009. State Water Board staff reviewed the information submitted by DFG describing the project activities and the proposed water quality protection measures. We also consulted with the Central Coast and Los Angeles Regional Water Quality Control Boards, and the U.S. Army Corps of Engineers regarding this project.

Pursuant to Title 23, section 3838 of the California Code of Regulations, I hereby make the Certification determination described in the Enclosure for these projects. Attachments A through D to the Enclosure are also part of this Certification.

If you require further assistance, please contact Darren Bradford, the staff person most knowledgeable on the subject, at (916) 341-5558 (dbradford@waterboards.ca.gov). You may also contact Bill Orme, Chief of the 401 Certification and Wetlands Protection Unit, at (916) 341-5464 (borme@waterboards.ca.gov).

ENCLOSURE

ORDER FOR CLEAN WATER ACT SECTION 401
WATER QUALITY CERTIFICATION FOR DEPARTMENT OF FISH AND GAME
2009 FISHERIES RESTORATION GRANT PROGRAM SOUTHERN PROJECT
FILE NO. SB09004IN

PROJECT: Department of Fish and Game (DFG) - 2009 Fisheries Restoration Grant
Program Southern Project (FRGP)

APPLICANT: Mr. Kevin Shaffer
Fisheries Branch
Department of Fish and Game
830 S Street
Sacramento, CA 95811

This Certification responds to your request on behalf of DFG for water quality certification for the subject project. Your complete application was received on June 25, 2009.

ACTION

- | | |
|---|---|
| <input type="checkbox"/> Order for Standard Certification | <input type="checkbox"/> Order for Denial of Certification |
| <input checked="" type="checkbox"/> Order for Technically Conditioned Certification | <input type="checkbox"/> Order for Waiver of Waste Discharge Requirements |

AUTHORIZATION:

This Certification conditionally certifies six restoration projects funded through the FRGP's 2009 grant cycle as listed in Attachment C.

This Certification does not apply to the placement of any new culvert or channel liner in any water body, unless the project has been approved in writing by the 401 Program Manager of the appropriate Regional Water Quality Control Board (Regional Water Board(s)). Such project will be identified by DFG in the notification submitted to the Regional Water Board as required in Condition 4 (Notification below). The 401 Program Manager has 30 days from the receipt of the notification to respond; otherwise, the project may proceed under this Certification.

STANDARD CONDITIONS:

1. This Certification action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to section 13330 of the California Water Code (CWC) and Article 6 (commencing with section 3867) of Chapter 28, Title 23 of the California Code of Regulations (CCR 23).
2. This Certification action is not intended and shall not be construed to apply to any activity involving a hydroelectric facility requiring a Federal Energy Regulatory Commission (FERC) license or an amendment to a FERC license unless the pertinent certification application was filed pursuant to subsection 3855(b) of Chapter 28, CCR 23, and the application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.
3. This Certification is conditioned upon total payment of any fee required under Chapter 28, CCR 23 and owed by the applicant.

ADDITIONAL CONDITIONS:

1. Best Management Practices (BMPs)
 - a. Appropriate BMPs shall be implemented throughout the project activities to help minimize sediment disturbance and suspension within the water as described in this section, and also in the Mitigated Negative Declaration (MND) for the 2009 FRGP. All BMP materials shall be onsite prior to construction activity and ready for use. BMPs shall be in full compliance with all specifications governing the proper design, installation, operation, and maintenance of such management practices.
 - b. No work shall be conducted during the winter period (November 1-April 15), unless prior approval has been obtained from the 401 Program Manager of the appropriate Regional Water Board(s).
 - c. Except for "minor actions" as described in the MND for the 2009 FRGP, all work areas shall be effectively isolated from stream flows using suitable control measures before commencement of any in-water work. The diverted stream flow shall not be contaminated by construction activities. All materials shall be stored outside the stream flood plain even when stream is dry or diverted.
 - d. Structures for isolating the in-water work area and/or diverting the stream flow (e.g., coffer dam, geo-textile silt curtain) shall not be removed until all disturbed areas are cleaned and stabilized.
 - e. In the event of rain, the disturbed in-water work area shall be temporarily stabilized before stream flow exceeds the capacity of the diversion structure. The disturbed streambed shall be stabilized so that the disturbed areas will not come in contact with the stream flow.
 - f. All areas disturbed by project activities shall be protected from washout and erosion.
 - g. For projects requiring re-vegetation of disturbed areas, native species shall be used.

- h. The discharge of petroleum products or other pollutants to surface waters that may result in violation of water quality standards is prohibited. Activities shall not cause visible oil, grease, or foam in the work area or downstream.
- i. Fueling, lubrication, maintenance, storage, and staging of vehicles and equipment shall not result in a discharge or a threatened discharge to any waters of the State.
- j. Dewatering and diversion activities shall be conducted in such a manner so as to minimize impacts to remaining streambed and banks.
- k. Equipment shall enter streambed only as necessary to conduct work.
- l. When a project is completed, any excess material or debris shall be removed from the work area and disposed of properly.

2. Posting

A copy of this Certification must be provided to the contractor and all subcontractors who will work at the project site, and must be in their possession at the work site. The project proponent and all contractors and subcontractors shall be familiar with all conditions of this Certification.

3. Monitoring

DFG shall provide to the State Water Resources Control Board (State Water Board) and appropriate Regional Water Board staff copies of reports documenting the following monitoring activities described in the MND for the 2009 FRGP:

- a. Post-project monitoring immediately after the activity is completed to ensure that projects are completed as designed; and
- b. Effectiveness monitoring on a random subset of ten percent of the projects, within one to three years after project completion.

4. Notification

No later than 15 days prior to the start of construction, or 30 days for any project involving the placement of a new culvert or a channel liner, project proponent shall submit to the 401 Program Manager of the appropriate Regional Water Board(s) a notification indicating the expected start/completion dates of project activities, project ID, and water body name(s).

For projects with placement of new culvert and channel liner, the notification shall also include the following information:

- a. Describe installation activities; include any structural control details, such as structure for diverting stream flow around the in-stream excavation area, temporary rubber dam, silt curtain, and any treatment device/facility;

- b. Describe the control measures or BMPs, during and post construction, to minimize impacts (e.g., habitat losses, erosion control measures, flow diversions; etc.);
- c. Any compensatory mitigation required by permitting agencies.

5. Reporting

While this Certification is in effect, or until all projects have been completed or de-funded, and for as long as required monitoring is occurring, DFG will submit annual reports on July 1st of each year to the 401 Program Managers of the State Water Board and the appropriate Regional Water Board(s) documenting work undertaken during the preceding year and identifying all such work:

- a. Project name and grant number as listed in Attachment C;
- b. Year of Certification;
- c. Project purpose and summary work description;
- d. Name(s) of affected water body(ies);
- e. Latitude/longitude in decimal degrees to at least four decimals;
- f. For projects completed during the year:
 - i. The type(s) of receiving (affected) water body(ies) (e.g., at a minimum: river/streambed, lake/reservoir, ocean/estuary/bay, riparian area, or wetland type); and
 - ii. The total quantity in acres of each type of receiving water body temporarily impacted, and permanently impacted;
- g. Actual construction start and end-dates for each project;
- h. Whether each project is on-going or completed; and
- i. Required monitoring reports as described in Additional Condition #3 (Monitoring).

Notifications and annual reports shall be directed to: Program Manager, Certification and Wetlands Program at the following State and appropriate Regional Water Board office(s):

State Water Resources Control Board
 Division of Water Quality
 1001 "I" Street, 15th Floor
 Sacramento, CA 95814

Central Coast Regional Water Quality Control Board
 895 Aerovista Place, Suite 101
 San Luis Obispo, CA 93401

Los Angeles Regional Water Quality Control Board
320 West Fourth St., Suite 200
Los Angeles, CA 90013

6. Violations

- a. DFG or its contractor and subcontractors shall verbally report any non-compliance to the 401 Program Manager of the appropriate Regional Water Board where the project is located within 24 hours from the time when DFG or its contractor and subcontractors become aware of the circumstances.
- b. DFG shall report in writing to the State Water Board and appropriate Regional Water Board all violations of any terms or conditions of this Certification within seven (7) consecutive days from the time DFG becomes aware of the violation. The written report shall contain:
 - i. A description of the violation and its cause;
 - ii. The period of the violation event, including dates and times, and if the violation has not been corrected, the anticipated time the violation is expected to continue; and
 - iii. Steps taken or planned to reduce, eliminate, and prevent recurrence of the violation.
- c. In the event of any violation or threatened violation of the conditions of this Certification, the violation shall be subject to any remedies, penalties, processes, or sanctions as provided for under State law. For purposes of the Clean Water Act (CWA) section 401(d), the applicability of any State law authorizing remedies, penalties, processes, or sanctions for the violation or threatened violation constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements incorporated into this Certification Order.
- d. In response to a suspected violation of any condition of this Certification Order, the State Water Board may require the holder of any permit or license subject to this Certification to furnish, under penalty of perjury, any technical or monitoring reports the State Water Board deems appropriate, provided that the burden, including cost of the reports, shall be in reasonable relationship to the need for the reports and the benefits to be obtained from the reports.
- e. In response to any violation of the conditions of this Certification Order, the State Water Board may add to or modify the conditions of this Certification as appropriate to ensure compliance.

ADMINISTRATIVE CONDITIONS:

1. The State Water Board reserves the right to suspend, cancel, or modify and reissue this Certification, after providing notice to DFG and/or responsible contractor/sub-contractor, if the State Water Board determines that the project fails to comply with any of the terms or conditions of this Certification.

2. A copy of this Certification, the application, and supporting documentation must be available at the project site during construction for review by site personnel and agencies. All personnel performing work on the proposed project shall be familiar with the content of this Certification and its posted location on the project site.
3. DFG shall grant State Water Board and Regional Water Board staff, or an authorized representative, upon presentation of credentials and other documents as may be required by law, permission to enter the project site at reasonable times, to ensure compliance with the terms and conditions of this Certification and/or to determine the impacts the project may have on waters of the State.

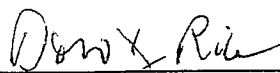

STATE WATER BOARD CONTACT PERSON:

If you have any questions, please contact State Water Board Environmental Scientist Darren Bradford at (916) 341-5558 or via e-mail at dbradford@waterboards.ca.gov or by mail at Certification & Wetland Program, State Water Board, 1001 I St., 15th Floor, Sacramento, CA 95814.

WATER QUALITY CERTIFICATION:

I hereby issue an order certifying that as long as all of the conditions listed in this Certification action are met, any discharge from the referenced project will comply with the applicable provisions of Clean Water Act sections 301 (Effluent Limitations), 302 (Water Quality Related Effluent Limitations), 303 (Water Quality Standards and Implementation Plans), 306 (National Standards of Performance), and 307 (Toxic and Pretreatment Effluent Standards). This discharge is also regulated pursuant to State Water Board Water Quality Order No. 2003-0017-DWQ which authorizes this Certification to serve as Waste Discharge Requirements pursuant to the Porter-Cologne Water Quality Control Act (Water Code, § 13000 et seq.).

Except insofar as may be modified by any preceding conditions, all Certification actions are contingent on (a) the discharge being limited and all proposed mitigation being completed in strict compliance with the Project Information Sheet (Attachment B), and (b) compliance with all applicable requirements of the Regional Water Board's Water Quality Control Plan and the Mitigated Negative Declaration for the 2009 FRGP.

Dorothy Rice, Executive Director
State Water Resources Control Board
