Project Title:	The 2012 Fisheries Restoration Grant Program (FRGP)
Regulating Water Board:	SB - State Water Board
Type of Project:	Habitat Restoration
Project Description:	
<p>The purpose of the project is to restore anadromous fisheries habitat in non-tidal reaches of rivers and streams, improve watershed conditions impacting salmonid streams, and improve the survival, growth, migration, and reproduction of anadromous fish. The CDFG, through FRGP, uses funds mandated to restore degraded anadromous fish habitat in coastal streams for a variety of salmonid habitat restoration projects. Restoration projects must be consistent with procedures found in CDFG's "California Salmonid Stream Habitat Restoration Manual".</p>

IMPACTS
Describe Potential Water Quality Impacts:
The water quality impacts were analyzed in the 2012 FRGP MND and were determined to be less than significant. See Appendix B (Section IX. Hydrology and Water Quality) of the 2012 FRGP MND for mitigation measures implemented to ensure impacts to water quality from the 2012 FRGP are less than significant.

MITIGATION
Describe Avoidance and Minimization for Impacts to Waters:
A combination of avoidance and minimization measures is proposed to offset potential effects of project construction to wetlands and waters of the U.S. All feasible and practical measures will be undertaken to avoid and/or minimize impacts to waters during construction. All restoration projects funded by FRGP will be conducted based on DFG's California Salmonid Stream Habitat Restoration Manuals (Flosi et al 1998, 2003, and 2006), and mitigation measures described in the MND for the 2012 FRGP.
