#### Attachment F

# TRTP: SEGMENT 6 SUPPLEMENT TO THE PROJECT INFORMATION SHEET

### COMPARISON OF IMPACTS TO MITIGATION

Implementation of the proposed Project will result in 4.45 acres and 16,814 linear feet acres of temporary impacts and 0.41 acre and 4,725 linear feet of permanent impacts to waters of U.S. and the state that are under the jurisdiction of the Corps and State Water Board, Los Angeles Regional Water Quality Control Board, and Lahontan Regional Water Quality Control Board (Regional Water Boards) (refer to Table 1 below and Attachment E).

## Impacts

Table 1. Summary of Impacts to State Water Board/Corps Jurisdictional Waters on Federal and Non-Federal Lands

Water Body Type	Temporary		Permanent	
	Acres	Linear feet	Acres	Linear feet
Riparian	3.5652	1,937	0.1945	290
Non-Riparian	0.8821	14,877	0.2135	4,435
Total	4.4473	16,814	0.408	4,725
Maintenance grading*	-0.5775		0	
Total Acreage requiring mitigation	3.8698		0.408	

<sup>\*</sup> Mitigation is not proposed for temporary impacts on 0.58 acre of Corps/State Water Board jurisdictional waters within existing roadways because Project activities (i.e., maintenance grading) will not impact streambed functions and values.

Compensatory mitigation is required for impacts to waters of the U.S. and the state in accordance with the mitigation ratios provided in the Final EIR/Supplemental Environmental Impact Statement (SEIS) for the SCE TRTP. Mitigation ratios are determined by the type of impact (temporary or permanent), type of habitat (specific to each mapped vegetation community), and if the impact occurs on federal or non-federal land. Mitigation is not proposed for temporary impacts on 0.58 acre of Corps/State Water Board jurisdictional waters within existing roadways because Project activities (i.e., maintenance grading) will not impact streambed functions and values, and permanent impacts within existing roadways are being mitigated at the proposed ratio for barren/developed land listed in the Final EIR/SEIS (1:1 ratio).

SCE will restore 3.87 acres of waters of the U.S. and state temporarily impacted by the TRTP on-site. In addition, SCE is required to provide 1.24 acres of off-site mitigation to replace functions and values of waters of the U.S. and state temporarily and permanently impacted by the TRTP (refer to Table 2 below and Attachment F).

### Mitigation

Table 2. Proposed Mitigation for Impacts to Corps/State Water Board Jurisdictional Waters on Federal and Non-Federal Lands by Mitigation Type (in acres)

Vegetation Type	Temporary Impacts Restored on-site (1:1; Proponent Provided)	Remaining Temp Mitigation off-site	Permanent Impact Mitigation off-site
Non-Federal Land			<del></del>
Non-Riparian	0.0571	0	0.0219
Riparian	3.5581	0	0.5613
Subtotal	3.6152	0	0.5832
Federal Land			
Non-Riparian	0.2475	0.0148	0.6015
Riparian	0.0071	0.0071	0.0373
Subtotal	0.2546	0.0219	0.6388
Grand Total	3.8698	0.0219	1.2220
	Total On-site: 3.8698	Total Off-site: 1.2439	,

Temporary impacts on federal land will be restored in accordance with the Habitat Restoration and Revegetation Plan (HRRP) - Segment 6 and 11 Angeles National Forest, prepared by Katie VinZant, ANF Botanist, dated September 2010. Temporary impacts on non-federal land will be restored in accordance with the Draft Mitigation and Monitoring Plan (MMP) Segment 6 Private Lands (forthcoming). The MMP also describes off-site mitigation for temporary and permanent impacts on federal and non-federal land through participation in the Los Angeles County Aquatic Resource In-Lieu Fee Mitigation Program operated by the Santa Monica Mountains Conservancy (SMMC). As described in "SCE TRTP Segment 6 Proposed State and Federal Waters Mitigation" letter from SCE to the regulatory agencies dated May 10, 2011, the funds provided to the SMMC by SCE will be used to acquire off-site habitat (jurisdictional waters) for preservation.

The USACE entered into an agreement for establishment and administration of the Los Angeles County Aquatic Resource In-Lieu Fee Mitigation Program with the SMMC. The agreement allows the payment of funds to the in-lieu fee program to satisfy USACE mitigation requirements and meet the USACE's goal of "no net loss" (in terms of functions and values) of aquatic resources. The In-Lieu Fee Program covers all portions of Los Angeles County and the Ventura County portions of the Santa Monica Mountains where SMMC or a SMMC joint powers authority (e.g. Mountains Recreation and Conservation Authority [MRCA], Santa Clarita Watershed Recreation and Conservation Authority, and Whittier/Puente Hills Conservation Authority) is actively involved.
