

	Waters
	Opportunities for restoration/enhancement activities that could improve water quality
	Developed Areas and Nurseries
N:	Source of Nitrogen (dissolved constituents)
P:	Source of Phosphorus (adsorbed constituents)
G:	Groundwater assimilation
T:	Source of turbidity
	Study Area
	Sub-basins Boundaries

Figure 10  
 Baseline Conditions Report  
 Watershed Scale Considerations  
 Potential Sources of Nutrients and Turbidity
