Wells with VOC detections.	5	3	1	3	1	3	1	4	1	
Detection frequency (percent).	18	11	4	11	4	11	4	14	4	

**Appendix 12F.** Analyses for volatile organic compounds (VOCs) at concentrations below the laboratory reporting limit (LRL) listed in order of detection frequency for 21 sampled wells in the INFPS study, Santa Ana NAWQA, California

[Sample dates are given in Appendix 3; percent values are detection frequencies; number below the compound is the data parameter code, which is a 5-digit number used in the USGS computerized data system, National Water Information System (NWIS), to uniquely identify a specific constituent or property; number in brackets below the parameter number is the LRL; concentrations in braces were less than the associated maximum field-blank concentrations and may require further evaluation; all concentrations are reported as micrograms per liter; concentrations reported as equal to the LRL were below the LRL prior to rounding; E, estimated; —, not detected]

NAWQA identification No.	Gasoline (29 percent)									Solvent (24 percent)				
	Methylbenzene (toluene) (34010)	Benzene (34030)	Ethylbenzene (34371)	Methyltert-butyl ether (MTBE) (78032)	1,3,5-trimethylbenzene (77226)	1,3 & 1,4-Dimethylbenzene (meta- & para-xylene) (85795)	1,2-Dimethylbenzene (77135)	1,2,3-Trimethylbenzene (77221)	Tetrachloroethylene (PCE) (34475)	Trichloroethylene (TCE) (39180)	n-Propylbenzene (77224)	1,1-Dichloroethane (34496)	1,2-Dichlorobenzene (34536)
