<sup>1</sup> Type of solution provides some sort of O&M Support

<sup>2</sup> Systems receiving TA with no cost information are funding through capacity development agreements. Total project cost is unknown until assistance is complete.

<sup>4</sup> Number indicates the solution process category as of June 2024: (1) Agreement Mailed, (2) Agreement Routing, (3) Application being Reviewed

System Size: Small water system (less than 3,300 connections)  
 Expanded small water system (between 3,301 and 6,600 connections)  
 Large water system (greater than 6,600 connections)

E	Existing Funding with approved cost
P	Potential Funding for FY 24/25 with requested cost
FP	Existing Full Planning TA project
Y	Consolidation Services Rendered by DDW

## Appendix B. FY 2024-25 Funding Solution List for Failing Systems

Technical Assistance (TA) = Assistance with preliminary planning, TMF assessments, engineering assistance, and project management

Interim = Interim replacement water (bottled water, hauled water, point of use devices)

Planning = Funding for feasibility studies, project design documents, and engineering/environmental reports

Construction = Funding for construction of distribution system replacement/repair, water meter installation, water treatment systems, source water construction/repair, and consolidation

Disadvantaged (DAC) Status: (D) - Disadvantaged, (SD) - Severely Disadvantaged, (ND) - Non Disadvantaged, (TBD) - To be determined

<sup>1</sup> Type of solution provides some sort of O&M Support

<sup>2</sup> Systems receiving TA with no cost information are funded through capacity development. Total project cost is unknown until assistance is complete.

<sup>3</sup> Number indicates the solution process category as of April 2024: (1) Agreement Mailed, (2) Agreement Routing, (3) Application in Review

Key:

Technical Assistance (TA) = Assistance with preliminary planning, TMF assessments, engineering assistance, and project management

Interim = Interim replacement water (bottled water, hauled water, point of use devices)

Planning = Funding for feasibility studies, project design documents, and engineering/environmental reports

Construction = Funding for construction of distribution system replacement/repair, water meter installation, water treatment systems, source water construction/repair, and consolidation

Disadvantaged (DAC) Status: (D) - Disadvantaged, (SD) - Severely Disadvantaged, (ND) - Non Disadvantaged, (TBD) - To be determined

System Size: Small System (3,300 connections or less)  
Expanded Small System (3,301 to 6,600 connections)  
Large System (6,601 connection or more)

E	Existing Funding with approved cost, if known
P	Potential Funding for FY 24/25 with requested cost, if known
FP	Existing Full Planning TA Project
Y	Consolidation Services Rendered by DDW

## Appendix D. Greenhouse Gas Reduction Fund Requirements

The expenditures from the Fund with moneys originating from the GGRF will be used for the purpose of facilitating the achievement of reductions of greenhouse gas emissions or to improve climate change adaptation and resiliency of GGRF Disadvantaged Communities or GGRF Low-Income Households or Communities. GGRF expenditures from the Fund will be administered in compliance with the Funding Guidelines for Agencies that Administer California Climate Investments (GGRF Funding Guidelines, available at: <https://ww2.arb.ca.gov/resources/documents/cci-funding-guidelines-administering-agencies>). The key items from the August 2018 GGRF Funding Guidelines for Program Administration (Section IV.A. of the GGRF Funding Guidelines) are below, along with a description of how the State Water Board will ensure compliance with that element.

GGRF Funding Guidelines Key Item: Identify program-specific statutory requirements (Section IV.A.1)

The Safe and Affordable Drinking Water Fund is established pursuant to Health and Safety Code section 116766. Chapter 4.6 of Part 12 of Division 104 of the Health and Safety Code establishes the requirements for use of the Fund. The Policy for the Development of the Fund Expenditure Plan for the Safe and Affordable Drinking Water Fund (adopted by the State Water Board on May 5, 2020, and amended October 19, 2021) and this Fund Expenditure Plan further describe applicable requirements associated with administering the SADW Fund. A Fund Expenditure Plan will be adopted by the State Water Board annually and reflect any applicable statutory changes.

GGRF Funding Guidelines Key Item: Ensure coordinated communication (Section IV.A.2)

- All funding recipients that receive allocations from the Fund that originate from the GGRF are required to include recognition of funding through the California Climate Investments (CCI) as follows:
  - **Branding and logo.** The “California Climate Investments” logo and name serve to bring under a single brand. All funding recipients must display the CCI logo on equipment and signage, as applicable, to acknowledge the funding source.
    - For stationary projects this may include, but is not limited to, a sign at the project site to acknowledge the funding source. The sign may include, for example, the CCI logo and the names (and/or logos) of other partners, organizations, or individuals.
    - For other project types, such as equipment and consumer-based incentives, funding recipients are also encouraged to identify the funding source by using a decal, sticker, or other signage that includes the CCI logo.

## Appendix D. Greenhouse Gas Reduction Fund Requirements

Guidance on the CCI logo usage, signage guidelines, and high-resolution files are contained in a style guide available at:

<http://www.caclimateinvestments.ca.gov/logo-graphics-request>.

- **Funding source acknowledgement.** The below language must be used on websites and included in announcements, press releases, and publications: “The [INSERT PROJECT NAME] is part of California Investments, a statewide program that put billions of Cap-and-Trade dollars to work reducing GHG emissions, strengthening the economy, and improving public health and the environment – particularly in DACs. The Cap-and-Trade program also creates a financial incentive for industries to invest in clean technologies and develop innovative ways to reduce pollution. California Climate Investments projects include affordable housing, renewable energy, public transportation, zero-emission vehicles, environmental restoration, more sustainable agriculture, recycling, and much more. At least 35 percent of these investments are located within and benefiting residents of DACs, low-income communities, and low-income households across California. For more information, visit the California Climate Investments website at: [www.caclimateinvestments.ca.gov](http://www.caclimateinvestments.ca.gov).”
- **Coordinated social media and website.** Recognition of funding under CCI program extends to publications, websites, signage, invitations, and other media-related and public outreach products. The email address: [CCIPress@arb.ca.gov](mailto:CCIPress@arb.ca.gov) will be included on any distribution lists and the twitter handle @CAClimateInvest Twitter will be posted on websites.

GGRF Funding Guidelines Key Item: Support transparency and provide public access to information on program activities and outcomes (Section IV.A.3)

To support transparency and public accountability, the State Water Board provides public access to information on the Fund and the broader SAFER Program in a variety of ways. Consistent with the GGRF Funding Guidelines, the State Water Board maintains information on its website that provides up-to-date program information, including:

**Funding opportunities.** The State Water Board continually accepts applications to support the drinking water needs of California communities. The Financial Assistance Application Submittal Tool (FAAST – [www.faast.waterboards.ca.gov](http://www.faast.waterboards.ca.gov)) is the gateway that is used to apply for funding and also can be used by the public to view what applications have been submitted. Since different applicants have worked with the State Water Board in different program areas, funding opportunity information is also posted on its SAFER Program, Office of Sustainable Water Solutions, Division of Financial Assistance, and Drinking Water State Revolving Fund web pages. The State Water Board staff and TA providers are also available to assist applicants representing DACs to apply for funding. The State Water Board will also announce funding opportunities using the California Climate Investments Events Calendar available at: [www.arb.ca.gov/cci-events](http://www.arb.ca.gov/cci-events).

## Appendix D. Greenhouse Gas Reduction Fund Requirements

**Public outreach events.** As described elsewhere in this Plan (see Section VI.D), the State Water Board is developing a Communication and Outreach Plan for the SAFER Program and is implementing a robust community engagement and public outreach process. The State Water Board is providing materials in other languages and provides language interpretation services. In addition, the State Water Board will conduct events and select locations and timing to encourage stakeholder and local community participation.

**All submitted applications and/or proposals – prior to funding decisions.** The GGRF Funding Guidelines require that administering agencies with programs that fund projects with competitive grant, loan, or contract solicitations, administering agencies must post basic information about the applications and proposals. In general, the State Water Board is accepting applications and proposals continuously and will provide funding to qualifying projects based on the prioritization discussed in Section IV of this Plan.

Consistent with the GGRF Funding Guidelines, the State Water Board continues to coordinate with CARB to identify any potential substantial burdens to priority populations imposed by projects or programs administered with Fund moneys. The Plan indicates that Fund expenditures will focus on solutions for small DACs and low-income households, and address emergency or urgent funding needs expeditiously only when no other funding source is available—these priorities mitigate potential economic displacement in disadvantaged communities, and, in fact, assist these communities safely remaining where they are. The State Water Board also continues to develop strategies to avoid funding projects that would impose substantial burdens. For example, State Water Board staff engage with community members and representatives making up the SAFER Advisory Group to receive advice and feedback on implementation of the Fund and components of the broader SAFER Program.

Should the State Water Board conduct a competitive solicitation, the State Water Board will post the applications and/or proposals that are submitted for consideration at least ten days before the State Water Board’s authorized representative makes a decision on funding awards. The minimum items that will be posted include:

- For each project application or proposal: Name of applicant; brief description of proposed project, including location; amount of funding requested; and whether the project is expected to provide benefits to priority populations.
- For each solicitation: A reference or website link to the project evaluation and selection criteria and solicitation materials.

**Final project selections – after funding decisions.** The State Water Board will post final project selections after the final decisions on funding awards have been made.

**Points of contact and resources for information and TA.** As discussed previously, the State Water Board’s web pages, Fact Sheets, press releases, social media posts,

## Appendix D. Greenhouse Gas Reduction Fund Requirements

and other outreach material will provide contact information for the public to ask questions or obtain additional information and TA.

**Project results, including greenhouse gas (GHG) emission reductions and co-benefits.** State Water Board staff will work with California Air Resources Board (CARB) staff to ensure the GHG emission reductions and co-benefits are evaluated in a manner consistent with CARB established protocols and procedures. The results of the California Climate Investments projects will be posted or a link provided to the California Climate Investments website for the Annual Report to the Legislature ([www.caclimateinvestments.ca.gov/annual-report](http://www.caclimateinvestments.ca.gov/annual-report)) and the CARB website for the online map ([www.arb.ca.gov/ccimap](http://www.arb.ca.gov/ccimap)). The information that the public can access will include the project location (e.g., address, census tract), funding amount, GHG emission reductions, co-benefits, and benefits to priority populations.

**Benefits to priority populations.** As described elsewhere in this Plan (see Section IX.B), reporting for projects funded by GGRF through the SADW Fund identify the potential benefits to priority populations. The applicable [benefit criteria tables](#) for each project type (e.g., Planning, Technical Assistance and Capacity Building) are used to determine the benefits to priority populations. The priority populations are evaluated based on a project being located within the boundaries of a GGRF disadvantaged or low-income community. An interactive map is available as a resource to determine geographic eligibility for GGRF disadvantaged and low-income communities. This map is available at: [www.arb.ca.gov/cci-communityinvestments](http://www.arb.ca.gov/cci-communityinvestments).

**Project outcome reporting.** State Water Board staff will work with CARB staff to track and report outcomes for projects to support accountability and transparency in communicating the Fund's success. State Water Board staff will select specific projects, in coordination with CARB staff, for which project outcomes will be reported. The project outcomes will be posted to the California Climate Investments website for the Annual Report to the Legislature.

**Opportunities for continued public engagement.** The State Water Board will provide multiple options to enable the public to remain involved and informed about investments (e.g., social media, list serves, Advisory Group meetings) after awards have been made (see Section VI.D).

GGRF Funding Guidelines Key Item: Establish policies and procedures for project monitoring, accountability, and audits (Section IV.A.4)

As with the other funding programs it administers, the State Water Board is subject to Legislative and Administration oversight, including audits by the Bureau of State Audits, Department of Finance, other State oversight agencies, or a third-party auditor. The State Water Board will apply its audit policies, and implement procedures to monitor all its funding programs, including projects funded by California Climate Investments and to conduct its own audits, inspections and project or program reviews of funding recipients, both during and after project implementation. Funding agreements that the State Water

## **Appendix D. Greenhouse Gas Reduction Fund Requirements**

Board enters into with funding recipients require recipients to make records available, if requested, to support project or program reviews or audits.

GGRF Funding Guidelines Key Item: Conduct public outreach and encourage community engagement, particularly for priority populations (Section IV.A.5)

The State Water Board is committed to a robust public outreach and community engagement process. Section VIII.E of the Policy and Section VI.D of this Plan describes community engagement and public outreach activities and approaches.

## Appendix E. List of Programs to Assist Households Supplied by Domestic Wells

Assistance Program	Description	Funding Program	Approved Funding Amount	Approximate # of Households	Location of Households
<b>Self-Help Enterprises Regional Bottled Water Program</b>	The Self-Help Enterprises Regional Bottled Water Program will provide bottled water to households served by public water systems and private household wells, located in the Self-Help Enterprises Service Area (Kern, Kings, Tulare, Fresno, Madera, Merced, Mariposa, San Joaquin and Stanislaus), that have urgent drinking water needs.	SB 200 Safe and Affordable Drinking Water	\$ 6,892,264	3,600	Fresno, Kern, Kings, Madera, Mariposa, Merced, Stanislaus, San Joaquin, and Tulare Counties
<b>Rural Community Assistance Corporation (SB108 Drinking Water Well Replacement Program)</b>	The Program provides funding for the replacement of failed drinking water wells for disadvantaged households that are served by domestic wells or for water systems serving disadvantaged communities with fewer than 15 service connections.	CA Emergency Relief Fund	\$ 7,050,002	50+	Statewide except in Self-Help Enterprises Service Area (Fresno, Kern, Kings, Madera, Mariposa, Merced, Stanislaus, San Joaquin, and Tulare)

## Appendix E. List of Programs to Assist Households Supplied by Domestic Wells

Assistance Program	Description	Funding Program	Approved Funding Amount	Approximate # of Households	Location of Households
<b>Self-Help Enterprises Tanks &amp; Hauled Water Program</b>	<p>The Program provides funding for the purchase and deliver temporary water storage tanks and hauled potable drinking water to households that have lost their water supply because of their well becoming dry, Assistance will be provided to homes until a long-term solution is in place.
