Subject: IMPORTANT: Enforcement of oil companies notifying nearby residents of fracking

Hello,

If the oil companies do not notify residents of fracking operations within 1,500 feet of their homes, how do the residents know to ask for a test of the groundwater?

Who enforces the oil companies notifying residents of fracking?

What is the definition of "well stimulation" as the water boards define it? I ask because DOGGR and AQMD have different definitions of "well stimulation."

Thank you,

Justin Bass
