

**Produced Water Ponds Status Report: January 31, 2019**

Senate Bill 83 Section 45 (statutes of 2015) requires that the State Water Resources Control Board post on its website a status report on the regulation of oil field produced water ponds within each region by January 30, 2016 and every six months thereafter. For the purpose of this report, a produced water pond is defined as an earthen structure, lined or unlined, that is used to store, dispose, treat and/or separate liquids; and of which produced water comprises a significant amount of liquid. This report includes the total number of ponds in each region, location, construction type, number and status of permitted and unpermitted ponds, and enforcement actions. Ponds are permitted only when the local Regional Water Quality Control Board determines that the discharge will not adversely impact water of current or potential future beneficial use. On September 23, 2018, Governor Brown signed Senate Bill No. 1493 (Chapter 742), which removed requirements for the State Water Resources Control Board to compile and post a status report on oil field produced water ponds in California. However, the State Water Resources Control Board will continue working with the Regional Water Quality Control Boards to update and post the status report on an annual basis.

The following tables summarize the status of produced water ponds in California as of January 31, 2019 for the reporting period of July 1, 2018 - December 31, 2018

- 1) Summary Table
- 2) Detailed Status Report Table - Unlined Ponds
- 3) Detailed Status Report Table - Lined Ponds
- 4) Detailed Status Report Table - Historical Ponds without Construction/Liner Data

**Table 1: Summary Table of Active and Inactive Ponds (July 1, 2018 - December 31, 2018)**

Regional Water Board	Active Ponds				Inactive Ponds				Total Ponds				Number of Ponds Under Enforcement Action(s) (Excluding Information Orders [13267])
	Permitted	Unpermitted	Lined	Unlined	Permitted	Unpermitted	Lined	Unlined	Permitted	Unpermitted	Lined	Unlined	
Central Coast	5	36	32	9	0	15	15	0	5	51	47	9	0
Los Angeles	0	76	76	0	0	2	0	2	0	78	76	2	0
Central Valley	501	60	31	530	236	296	25	507	737	356	56	1037	161
Santa Ana	0	2	0	2	0	0	0	0	0	2	0	2	0

Notes

- 1: Waste Discharge Requirement (WDR) - California Water Code Section 13374 outlines that Waste Discharge Requirements (permits) may be issued by Regional Water Boards to regulate point discharges of fluids, including oil field produced water ponds. All facilities covered by a WDR must meet water quality objectives set by the Regional Water Board and are inspected regularly. This also includes ponds covered by the Central Valley Regional Water Quality Control Board's General Permit, adopted in 2017.
- 2: WDR permits are pending for active unpermitted ponds. The Central Coast Regional Water Board is permitting unpermitted ponds, when appropriate, on a case-by-case basis. At this time all ponds in the Central Coast Region have an active WDR. The Central Valley Regional Water Board is in the process permitting unpermitted ponds, when appropriate, under general orders.
- 3: Cleanup and Abatement Order (CAO) - California Water Code section 13304 allows Regional Water Boards to issue an order to a discharger to clean up and abate the effects of a discharge of contaminant(s) or threatened pollution or nuisance.
- 4: Information Order (13267 letter) - California Water Code Section 13267 allows Regional Water Boards to require dischargers to furnish technical or monitoring reports as necessary. The technical reports are used to evaluate the nature, extent, circumstances, and impacts of discharges to waters of the state. The technical reports are used to evaluate the nature, extent, circumstances, and impacts of discharges to waters of the state.
- 5: Notice of Violation (NOV) - These letter notices are issued by Regional Water Boards to operators who have not responded to 13267 orders within the required time, have responded late, or have provided incomplete responses.
- 6: Pond Status Definitions:  
 Active - Facility has a pond(s) that is currently receiving produced water.  
 Inactive - Facility has a pond(s) with a physical connection to a produced water source, but not currently receiving produced water.  
 Historical - Facility with no physical connection to a produced water source and that appears to have been out of service for an extended period of time.  
 Current - Ponds that are "Active" or "Inactive".
- 7: A dash (-) indicates either no data or non-applicable

Produced Water Ponds Status Report: January 31, 2019
