

## **Statewide Advisory Committee on Cooling Water Intakes Structures (SACCWIS)**

For Implementation of the State Water Resources Control Board's  
Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power  
Plant Cooling (Once-Through Cooling or OTC Policy)  
Draft Local and System-Wide 2021 Grid Reliability Studies Report

### **AGENDA**

August 23, 2019  
9:00 a.m. to 11:00 a.m.  
Joe Serna Jr.-CalEPA Building  
1001 I Street, Sacramento  
Training 1 West/East First Floor  
Conference Line: 888-808-6929; Participant Code: 3167024

1. Welcome and introductions
2. Presentation by the Inter-Agency Working Group on the Draft Local and System-Wide 2021 Grid Reliability Studies Report – Presented by the California Public Utilities Commission and California Independent System Operator
3. Public comments
4. Action items:
  - a. Consider the Draft Local and System-Wide 2021 Grid Reliability Studies Report for approval.
  - b. Consider making a recommendation to the State Water Resources Control Board (State Water Board) for deferral of the compliance date for Alamos Generating Station Units 3, 4, and 5 for two years ending December 31, 2022.
  - c. Consider if the compliance date of one or more additional once-through cooling power plants needs to be deferred to mitigate system-wide grid reliability concerns starting summer 2021 and, if needed, determine a path forward to select one or more additional power plants for deferral.
  - d. Determine if another meeting of the SACCWIS is needed in 2019.
  - e. Designate a SACCWIS representative to present the findings of the Draft Local and System-Wide 2021 Grid Reliability Studies Report to the State Water Board.
5. Public comments on non-agenda issues
6. Adjourn

---

<sup>i</sup> Public comments are solicited prior to any decisions by SACCWIS members
