

State Water Resources Control Board

January 14, 2026

Dr. Luciana Pereyra
Trussell Technologies, Inc.
380 Stevens Avenue, Suite 212
Solana Beach, CA, 92075

Dear Dr. Pereyra,

In January 2024, Trussell Technologies, Inc. submitted a Standard Operations SOP for the analysis of Total Fluorescence as part of the East Valley Water District Quality Assurance Project Plan for the Sterling Natural Resources Center. The State Water Resources Control Board Staff determined the SOP, *In-house Total Fluorescence (TF) by fluorescence regional integration (FRI). Rev 0.1-2024*, meets all quality assurance and quality control requirements. The SOP appropriately adopts scientifically credible and widely accepted methods, as advised, and is hereby approved. Any modifications or revisions to the SOP are subject to review and reapproval by the State Water Resources Control Board.

This letter serves as notice that Trussell Technologies, Inc. has been approved for the use of their in-house Total Fluorescence Standard Operations Procedure (SOP) for monitoring constituents of emerging concern pursuant to the Water Quality Control Policy for Recycled Water (Recycled Water Policy) since March 2024.

Please note that the use of Trussell Technologies Inc. SOP for Total Fluorescence is only approved for the purposes outlined in the Recycled Water Policy, Attachment A, and does not extend the use of this SOP for any other purposes.

Sincerely,

Angelica Rojas
