

State Water Resources Control Board

Executive Director Designee Certification of Trash Full Capture Systems (Updated June 2025)

The State Water Resources Control Board Executive Director's designee has received applications and certified the trash full capture systems (Systems) listed in the first table below, per the requirements of the Trash Provisions.¹ Legacy Systems certified pursuant to the Trash Provisions are listed in the second table below, with a certification date of December 2, 2015 (the effective date of the Trash Provisions). Legacy Systems include those full capture systems that were listed in Appendix I of the Bay Area-wide Trash Capture Demonstration Project, Final Project Report (May 8, 2014). All Systems remain certified unless and until they are decertified by the State Water Board's Executive Director or designee. The Trash Implementation Program webpage also includes a list of decertified Systems, including the reasons for decertification.

The tables below include the names of the applicants of the certified Systems. Applicants own the design of the Systems or were designated in writing by the owner of the design to pursue certification. Applicants may also manufacture or distribute the Systems or this may be done by third parties authorized by the applicant and specified in the application.

The tables also include the dates of certification and, if applicable, the date of any update or decertification. Systems are either identified by their application number or, for Legacy Systems, by an alpha numeric designation.

The Systems must be sized, manufactured, and installed according to the certified application to be compliant with the Trash Provisions. This also serves as certification of multi-benefit trash full capture systems listed separately in the document Certified Multi-Benefit Trash Full Capture Systems, first certified by the Executive Director's designee on August 4, 2017. Multi-benefit trash systems shall be designed in accordance with the criteria in that document. The document is available on the [Trash Implementation Program webpage](#).

The applicant shall submit an amended application under the following circumstances:

1. If an applicant is proposing design feature revisions to a certified System (including revisions to or additions of filters, screens, configurations, bypass

¹ Amendment to the Water Quality Control Plan for Ocean Waters of California to Control Trash (Ocean Plan) and Part 1 Trash Provisions of the Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, And Estuaries of California adopted by the State Water Board located on the Statewide Water Quality Control Plans for Trash webpage at:
https://www.waterboards.ca.gov/water_issues/programs/trash_control/documentation.html

Executive Director Designee Certification of Trash Full Capture Systems (Updated June 2025)

or other physical characteristics that affect the functionality of a certified System), the applicant must submit an amended application for re-certification before use or sale of the updated System.

2. If the applicant is proposing minor revisions to the original certified application (i.e. routine revisions to the applicant's contact information or to installation or maintenance instructions), the applicant may do so without delaying the use or sale of the certified System. Such minor revisions do not affect a System's certification status. The Executive Director reserves the right to require re-certification of an amended application with such revisions if it is determined that the revisions are significant enough to warrant re-certification. In such an instance and upon notice from State Water Board staff, the applicant must wait for re-certification of the updated application prior to use or sale of the updated System.

Instructions for submitting an amended application are included in the Application Requirements for Trash Full Capture System Certification, which is available on the Trash Implementation Program webpage at:

https://www.waterboards.ca.gov/water_issues/programs/stormwater/trash_implementation.html

Certified System applications are available on the [California Stormwater Quality Association \(CASQA\) website](https://www.casqa.org/resources/water-quality-priorities/trash/certified-trash-full-capture-systems-available-to-the-public) (<https://www.casqa.org/resources/water-quality-priorities/trash/certified-trash-full-capture-systems-available-to-the-public>).

Table 1. New Applications Certified by the Executive Director Designee

Application Number	Applicant's Name and System Name	Date of Certification and, if Applicable, Update and/or Decertification Date
1	AquaShield™ – Aqua-Swirl® Stormwater Treatment System	08/04/2017 Updated 01/06/2023
2	Inventive Resources Inc. – Water Decontaminator	03/15/2018 Updated 02/05/2021
3	Advanced Drainage Systems, Inc. – FLEXSTORM Full Trash Capture Inserts	03/15/2018 Updated 04/21/2021 Updated 12/20/2024 Decertified 06/05/2025
4	Bio Clean® Environmental Services, Inc. – Curb Inlet and Grate Inlet Filters	03/15/2018 Updated 10/21/2021 Updated 04/29/2024
5	Jensen® Stormwater Systems – Jensen® Deflective Separator	03/15/2018
6	Bio Clean® Environmental Services, Inc. – Debris Separating Baffle Box	03/15/2018
7	CleanWay® Environmental Partners, Inc. – Curb Inlet Filtration System	03/15/2018 Decertified 07/19/2021
8	CleanWay® Environmental Partners, Inc. – Drop Inlet Device	03/15/2018 Decertified 07/19/2021
9	StormTrap® – SiteSaver®	03/15/2018 Updated 02/23/2021
10	Hydro International® – Hydro DryScreen®	07/10/2018 Updated 05/05/2021
11	Hydro International® – Hydro Up-Flo Filter®	07/10/2018
12	Revel Environmental Manufacturing Inc. – Triton™ Crescent Pipe Screen	07/10/2018 Updated 08/19/2024
13	Revel Environmental Manufacturing Inc. – Triton™ Perf-Full Trash Capture Insert	07/10/2018 Updated 12/21/2021
14	Hydro International® – Downstream Defender® (In-Line and Off-Line Configurations)	07/10/2018
