Hi there. It was brought to our attention that you show a fact sheet for Santa Rita Creek that identifies it in San Luis Obispo County then references data source from City of Salinas in Monterey County. We checked and confirmed that there is a Santa Rita Creek in SLO Co but we are unaware of any water quality from that Santa Rita Creek. We are aware of the data you reference in the fact sheet as applicable to Santa Rita Creek near the City of Salinas in Monterey County. I think you can simply edit the references to SLO County out of the fact sheet and identify it as in Monterey County and the problem will be taken care of. Thanks.
