**RE: Comment Letter – Mission Linen Supply UST Case Closure Summary
702 East Montecito Street, Santa Barbara, California**

Dear Ms. Townsend:

Mission Linen Supply (Mission) is submitting this comment letter pursuant to the Notice of Opportunity for Public Comment correspondence dated December 21, 2011 that included the State Water Resources Control Board (SWRCB) UST Case Closure Summary for the above referenced site. Mission would like to provide the following two comments.

1. We appreciate and support the SWRCB petition process as it has provided a forum for an independent, third-party review of the technical and regulatory issues which we firmly believe was needed in this case. The SWRCB staff involved (Ben Wright and George Lockwood) were professional and objective in the process and evaluation.
2. We concur with the technical analysis and opinions of the SWRCB included in the UST Case Closure Summary. This document was reviewed by our three technical consultants that were involved in the project with more than 60 years of combined environmental consulting experience including two California-registered professional geologists.

Please do not hesitate to contact me with any questions regarding this letter.

Regards,

Don Bock, ARM
Director of Risk Management
Mission Linen Supply
