ENVIRONMENTAL INFORMATION FOR PETITIONS

This form is required for all petitions.

Before the State Water Resources Control Board (State Water Board) can approve a petition, the State Water Board must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared, a determination must be made of who is responsible for its preparation. As the petitioner, you are responsible for all costs associated with the environmental evaluation and preparation of the required CEQA documents. Please answer the following questions to the best of your ability and submit any studies that have been conducted regarding the environmental evaluation of your project. If you need more space to completely answer the questions, please number and attach additional sheets.

DESCRIPTION OF PROPOSED CHANGES OR WORK REMAINING TO BE COMPLETED

For a petition for change, provide a description of the proposed changes to your project including, but not limited to, type of construction activity, structures existing or to be built, area to be graded or excavated, increase in water diversion and use (up to the amount authorized by the permit), changes in land use, and project operational changes, including changes in how the water will be used. For a petition for extension of time, provide a description of what work has been completed and what remains to be done. Include in your description any of the above elements that will occur during the requested extension period.

The City of Glendale proposes to deliver up to 3,100 acre-feet per year of Title 22 disinfected, tertiary treated recycled water to the City of Pasadena for irrigation. The Pasadena Non-Potable Water Project is proposed to convey recycled water from the Los Angeles-Glendale Water Reclamation Plant (LAGWRP) to potential customers through a pump stations, a transmission pipeline, and distribution mains. The City of Pasadena is responsible for funding and phased construction of the project. The first phase is estimated to be operational in 2018 and the last phase (Phase VI) to be operational in 2028.

For additional information on the Pasadena Non-Potable Water Project, please refer to the draft and final Environmental Impact Reports (EIR) attached to this submittal (CD).

The City of Glendale also plans to expand their recycled water system to connect 9 additional customers with an approximate demand of 400 ac-ft (City) is entitle to 50 percent of the effluent from the LAGWRP, which is a 20 million gallons per day (mgd) facility co-owned by the City and the City of Los Angeles. The City's existing recycled water system consists of approximately 22 miles of "purple also plans to expand their recycled water system to include 9 additional customers with an estimated demand of 331 acre-feet per year, through four expansions segments which are identified in Attachment 2 of this submittal.

Coordination with Regional Water Quality Control Board

For change petitions only, you must request consultation with the Regional Water Quality Control Board regarding the potential effects of your proposed change on water quality and other instream beneficial uses. (Cal. Code Regs., tit. 23, § 794.) In order to determine the appropriate office for consultation, see: http://www.waterboards.ca.gov/waterboards_map.shtml. Provide the date you submitted your request for consultation here, then provide the following information.			Date of Request 6/28/2016				
Will your project, during construction or operation, (1) gen wastewater containing such things as sewage, industrial or agricultural chemicals, or (2) cause erosion, turbidity or	chemicals, metals,	0	Yes	No			
Will a waste discharge permit be required for the project?			Yes	No			
If necessary, provide additional information below:							
Construction of the project may generate waste, as well as cause erosion, turbiall potential impacts and determines mitigation measures to ensure the impact	idity, or sedimentation. The final E is less than significant with mitigati	R (inclu	uded in Attac	hment 5) lists
