

[SUMMARY OF FINAL SUBMITTED VERSION]**REPORT OF LICENSEE FOR 2009**

Primary Owner: OAKDALE IRRIGATION DISTRICT
 Application Number: A001081
 License Number: 002012
 Date Submitted: 04/11/2011

Compliance with License Terms and Conditions	
The project has been abandoned and I request revocation of my water right license	No
I have reviewed my water right license	Yes
I am complying with all terms and conditions	Yes
Description of noncompliance with terms and conditions	
Intake location has been changed	
Description of intake location changes	
Type of use has changed	
Description of type of use changes	
Place of use has changed	
Description of place of use changes	

Purpose of Use	
Irrigation	112470 Acres Mixed Crop Types

Month	Amount directly diverted or collected to storage (Acre-Feet)	Amount used (Acre-Feet)
January	0	0
February	0	0
March	0	0
April	0	0
May	0	0
June	0	0
July	0	0
August	0	0
September	0	0
October	0	0
November	0	0
December	96195	96195
Total	96195	96195

Month	Maximum Rate of Diversion (CFS)
January	
February	
March	
April	

May	
June	
July	
August	
September	
October	
November	
December	

Reservoir name	Spilled this year	Feet below spillway at maximum storage	Completely emptied	Feet below spillway at minimum storage	Method used to measure water level
New Melones	No	104	No	132	Float Well

Conservation of Water	
Are you now employing water conservation efforts?	Yes
Description of water conservation efforts	lining ditches, control and recapture drain water, improve control and monitoring systems.
Amount of water conserved	0 Acre-Feet

Water Quality and Wastewater Reclamation	
During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?	No
Amount of reclaimed, desalinated, or polluted water used	

Conjunctive Use of Groundwater and Surface Water	
During the period covered by this Report, were you using groundwater in lieu of available surface water authorized under your license?	Yes
Amounts of groundwater used	0 Acre-Feet

Additional Remarks
A storage right in New Melones Reservoir substituted for the Districts Melones Reservoir that was inundated.

Reservoir name	Spilled this year	Feet below spillway at maximum storage	Completely emptied	Feet below spillway at minimum storage	Method used to measure water level
New Melones	No	70.70	No	147.30	Float Well

Conservation of Water

8. Are you now employing water conservation efforts?	Yes
Description of water conservation efforts	Lining ditches, control and recapture drain water, improve control and monitoring systems.
9. Amount of water conserved	

Water Quality and Wastewater Reclamation

10. During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?	No
11. Amount of reclaimed, desalinated, or polluted water used	

Conjunctive Use of Groundwater and Surface Water

12. During the period covered by this Report, were you using groundwater in lieu of available surface water authorized under your license?	Yes
13. Amounts of groundwater used	

Additional Remarks

<p>Monthly diversions to and from storage are estimated based on New Melones Reservoir measurements. Use pursuant to this license pertains to the old Melones Reservoir. Because Melones Reservoir was inundated by New Melones Reservoir the measurement of actual diversions to and from storage pursuant to this License are not readily available. The natural flow in the Stanislaus River, as well as actual inflow to New Melones Reservoir, exceeds the capacity of Melones Reservoir, which would have resulted in the filling of Melones and full utilization of the License. Lands also receive water reported under Applications 2524, 3091, 10978, and Statement 4683. Report prepared by Authorized Official per information provided by Owners.</p>

6q. Exchange or settlement of prior rights	
6r. All monthly reported diversion claimed under the prior rights	
6s. Amount (Acre-Feet) of reported diversion solely under contract	

7. Water Diversion Measurement

a. Required to measure as of the date this report is submitted	Yes
b. Is diversion measured?	Yes
c. An alternative compliance plan was submitted to the division of water rights on	
d. A request for additional time was submitted to the division of water rights on	03/01/2017

8. Storage

Reservoir name	Spilled this year	Feet below spillway at maximum storage	Completely emptied	Feet below spillway at minimum storage	Method used to measure water level
New Melones	No	201.10	No	276.70	Float Well

Conservation of Water

9. Are you now employing water conservation efforts?	Yes
Description of water conservation efforts	Lining ditches, control and recapture drain water, improve control and monitoring systems.
10. Amount of water conserved	

Water Quality and Wastewater Reclamation

11. During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?	
12. Amount of reclaimed, desalinated, or polluted water used	

Conjunctive Use of Groundwater and Surface Water

13. During the period covered by this Report, were you using groundwater in lieu of available surface water authorized under your license?	Yes
14. Amounts of groundwater used	

Additional Remarks

The measurement device at New Melones Dam is controlled by Bureau of Reclamation. Per the Bureau's Water Right Specialist, measurement device specifications required by new monitoring and measuring regulations were not available at the time this report was initially submitted. The Bureau filed a Request for Additional Time, to supply this information, on 3/1/2017. As this information becomes available, the Bureau will amend their reports, and this report will be amended with monitoring device information imported from the Bureau's water right reports. Monthly diversions to and from storage are estimated based on New Melones Reservoir measurements. Use pursuant to this license pertains to the old Melones Reservoir. Because Melones Reservoir was inundated by New Melones Reservoir the measurement of actual diversions to and from storage pursuant to this License are not readily available. The natural flow in the Stanislaus River, as well as actual inflow to New Melones Reservoir, exceeds the capacity of Melones Reservoir, which would have resulted in the filling of Melones and full utilization of the License. Lands also receive water reported under Applications 2524, 3091, 10978, and Statement 4683. Report prepared by Authorized Official per information provided by Licensees.

Additional Remarks

The measurement device at New Melones Dam is controlled by Bureau of Reclamation. Per the Bureau's Water Right Specialist, measurement device specifications required by new monitoring and measuring regulations were not available at the time this report was initially submitted. The Bureau filed a Request for Additional Time, to supply this information, on 3/1/2017. As this information becomes available, the Bureau will amend their reports, and this report will be amended with monitoring device information imported from the Bureau's water right reports. Monthly diversions to and from storage are estimated based on New Melones Reservoir measurements. Use pursuant to this license pertains to the old Melones Reservoir. Because Melones Reservoir was inundated by New Melones Reservoir the measurement of actual diversions to and from storage pursuant to this License are not readily available. The natural flow in the Stanislaus River, as well as actual inflow to New Melones Reservoir, exceeds the

capacity of Melones Reservoir, which would have resulted in the filling of Melones and full utilization of the License. Lands also receive water reported under Applications 2524, 3091, 10978, and Statement 4683. Report prepared by Authorized Official per information provided by Licensees.

7. Water Transfers	
7a. Water transfered	No
7b. Quantity transfered (Acre-Feet)	
7c. Dates which transfer occurred	/ to /
7d. Transfer approved by	

Water Supply Contracts	
7e. Water supply contract	No
7f. Contract with	
7g. Other provider	
7h. Contract number	
7i. Source from which contract water was diverted	
7j. Point of diversion same as identified water right	
7k. Amount (Acre-Feet) authorized to divert under this contract	
7l. Amount (Acre-Feet) authorized to be diverted in 2020	
7m. Amount (Acre-Feet) projected for 2021	
7n. Exchange or settlement of prior rights	
7o. All monthly reported diversion claimed under the prior rights	
7p. Amount (Acre-Feet) of reported diversion solely under contract	

8. Storage					
Reservoir name	Spilled this year	Feet below spillway at maximum storage	Completely emptied	Feet below spillway at minimum storage	Method used to measure water level
New Melones	No	37.10	No	85.30	Float Well

Conservation Supporting Information
Description of conservation methods

lining ditches, control and recapture drain water, improve control and monitoring systems	
Description of baseline water use and time period Will provide supplement	
Description of conservation calculation methods Will provide supplement.	
Conserved water used?	No

Additional Remarks
Report prepared by Licensees' consultant based on information provided by Licensees. The measurement device at New Melones Dam is controlled by the U.S. Bureau of Reclamation (USBR). USBR filed a Request for Additional Time on 3/1/2017 to comply with State regulations for measurement devices. Monthly diversions to and from storage are estimated based on New Melones Reservoir measurements. Use pursuant to this license pertains to the old Melones Reservoir. Because Melones Reservoir was inundated by New Melones Reservoir the measurement of actual diversions to and from storage pursuant to this License are not readily available. The natural flow in the Stanislaus River, as well as actual inflow to New Melones Reservoir, exceeds the capacity of Melones Reservoir, which would have resulted in the filling of Melones and full utilization of the License. Lands also receive water reported under Applications 2524, 3091, 10978 , and Statement 4683.
