Subject: Comments for May 6 Workshop on Order WR 2009-0027-DWR

Jeannie Townsend
Clerk to the Board
State Water Resources Control Board 1001 1 Street
Sacramento, CA 95814

Randy Poole
General Manager/ Chief Engineer
Sonoma County Water Agency
PO Box 11628
Santa Rosa, CA 95406

Dear Chairman Hoppin and Members of the Board,

I am writing to express my concern regarding impacts related to Order 2009-0027- DWR and modifications in permit terms that would reduce those impacts. The reduction in flows will cause severe impacts to water quality, recreation, community water systems, over-summering juvenile salmon and Steelhead as well as the lower River economy that depends on a healthy Russian River.

My sister has lived along the Russian River for over 30 years and we own a home in Rio Nido. Our family and friends enjoy spending our days at, and swimming in the River. There is a wonderful community of residents and visitors to the Russian River. With low flows, residents are affected by an unclean, unhealthy River and bbusinesses suffer from fewer visitors who come to the River. The lower river economy depends on summer visitors to make it through each year and the flow reduction will harm local businesses, hurt our economy and negatively affect the vibrancy of our community.

In order to reduce the impact from reduced flows under Order 2009-0027-DWR, we urge you on May 6 to take action to protect water quality and beneficial uses in the Russian River. Specifically we urge you to:

- Increase frequency of chemical water quality monitoring to every two weeks with results posted promptly on a public website to proactively prevent water quality problems such as algae blooms from increased nutrient concentrations.
- Include new provisions in the order to require flow changes in response to violations in water quality standards, or as needed to protect juvenile ESA listed fish over the summer. The water agency released water to protect grapes from frost on April 14 to 16, so we expect increases to protect water quality as well.
- Installation of additional gauges as needed to ensure instantaneous flow compliance levels are maintained. In 2004 and 2007 compliance levels were violated under previous orders.
- A minimum of 25% mandatory conservation for SCWA customers and all users downstream of Dry Creek to help maintain flows and conserve water in case of multi-year drought.
- Mandatory conservation by all permitted water diversions upstream of Dry Creek, including agricultural and rural residential diversions and streamside wells pumping underflow.
- Additional prohibitions in the Order on diversions that are not permitted in critically dry conditions or, if needed, a separate order restraining those unpermitted diversions to protect water storage in Lake Mendocino and maintain higher flows.
- Keep order prohibition on commercial turf irrigation in SCWA service area and expand to include all commercial turf using water from the Russian River.

We believe that modifying the order to include these provisions will improve protection of water quality, juvenile endangered fish and likely result in somewhat higher flows due to reduced diversions. We greatly appreciate your consideration of our comments.

Sincerely,
Irwin and Sadie Lum
