Subject: Bay-Delta Workshop Panels

Dear Dr. Bernstein,

The Department of Water Resources (the Department) is pleased to provide the following list of speakers for the upcoming Water Quality Control Plan update workshops. As we discussed on the phone, these names are the Department's best guess at this time as to the experts it will rely upon to present on discrete topics within the larger subject matter of each workshop. These individuals each have expertise that will aid the State Water Resources Control Board (State Board) and its staff in understanding the current and evolving science. However, the Department may find it necessary to adapt this list based upon the evolving nature of available information particularly from the BiOp process, the content of comments received by the State Board, and the ultimate focus of the Department's presentations at the workshops.

Please include time for the Department to present at each of the workshops with the following experts:

Workshop 1

Ted Sommer + 3 support staff in attendance - X2 and non-flow criteria

Russ Stein - BDCP decision tree as it relates to Workshop 1

Andrew Schwarz - climate change non-flow criteria

Aaron Miller - X2

Workshop 2

Ted Sommer + 4 support staff in attendance - Pelagic fish science

Brad Cavallo - Salmon fish science

Russ Stein - BDCP's incorporation of current fish science and the protection of species

Workshop 3

Brad Cavallo - DPM

Tara Smith/Parviz Nader - DSM2

Eric Reyes - Calsim

Please contact either Parviz Nader-Tehrani or me if you have any questions, and the Department looks forward to a productive workshop process.

Tripp Mizell, Staff Counsel
