

STATEMENT OF QUALIFICATIONS

Randall D. Baxter

Education: Humboldt State University, B.S., Fisheries, May 1981.

Humboldt State University, M.S., Natural Resources, May 1991.

Employment:

California Dept of Fish and Game, Delta Outflow/San Francisco Bay Study, Project Assistant, September 1988 to present.

Designed and carried out monthly surveys of fish and invertebrate populations in the San Francisco Bay Estuary. Responsible for analysis and report preparation for all flatfish, cottid and smelt. Designed and conducted a stratified random beam trawl survey in an effort to estimate numbers of small juvenile English sole, starry flounder and Crangon shrimp.

Humboldt State University Foundation, Recreational Impact Assessment Project, Project Assistant, November 1987 to September 1988.

Designed and conducted a sampling project to determine: 1) number and type of recreational users; 2) frequency and duration of use; and 3) users assessment of aesthetic or physical impact associated with recreation near a bleach kraft pulp mill effluent outfall. Analyzed and wrote up findings.

U.S. Forest Service, Six Rivers National Forest, Habitat Typing/Salmonid Abundance Project, Field Team Leader, May 1987 to November 1987.

Planned and led three member habitat typing/direct observation fish censusing team that surveyed four tributaries to the Klamath and Trinity rivers.
