Subject: Recient Ruling

Greetings,

I think the recient rule to send more water to the sea is not needed. All the abundant rain we had a few years back did not increase the population of fish. If more water would help that should have illustrated it. Also keeping more water for surface use would help the ground water because the users of that surface water would not need to pump, or at least pump less.

Thank you for your time.

Regards

Galen Alldrin
