**Subject:** Work with local California water districts.

**Importance:** High

Dear California State Water Resource Control Board,

As a citizen of the United States of America and a lifelong resident of the State of California, I ask you strongly consider the impact your decisions will have on agriculture in the State of California.

Agriculture is what makes California thrive! Our climate, along with our water availability and infrastructure is like nowhere else in world. We must protect that!

Your rash decisions are setting into motion policies that will destroy California.

Please consider the facts and experience; **work with local California water districts to find voluntary alternatives.**

Thank you for your consideration,

JLB
