

Dear State Board,
Where have all the Salmon gone?
And why are the Jelly Fish moving
further and further up river every year?

It's common sense.

Please stop sending water down
south.

I urge you to at least adopt your
findings from 2010 and require that
60% of the San Joaquin River's Springtime
flow reach the delta, in order to
support restoration of a sustainable
delta and Salmon population

Sincerely

Donald L. Lipary
