

Please stop before you increase water exports for fish and consider the results on the people of the area and those who depend on the food grown in the area. What is more important than our fellow man and his survival?

Note the following from the Turlock paper:

would create an "unavoidable and significant" impact. Besides turning even more agricultural fields into dust bowls, it would put hundreds, if not thousands, of people out of work and significantly raise water rates. The human impact would be tremendous and far too much for our already struggling region to bea
