

Ms. Townsend

Subject line, "Comment Letter – Bay-Delta Plan SED."

I live on the DELTA and have seen the decline of the water quality the systematic deadly effect of the Fish population and the ever growing weed problem.

It is very important we get MORE fresh water released into the San Joaquin, not less. The State Water Board's own Delta Flows report released in August 2010 recommended more fresh water for the Delta.

We need LESS salt in the San Joaquin River for use by Delta farmers, not more! The Delta farmers have senior water rights. They deserve the freshest water first, not the South San Joaquin valley farmers who have junior water rights, many of whom are mega-corporations and should not be getting subsidized water, let alone the freshest water. It is those desert farmlands that leech out salts and selenium into the runoff water. Save the Fish & Delta farms.
