

To Whom It May Concern:

I've just read about the current proposal to increase water exports from the Tuolumne, Stanislaus, and Merced Rivers. I am writing to you today to ask you to please reconsider this action. I believe protecting wildlife is important but this should be a secondary consideration when it affects real jobs and real people. And all of this is proposed when there is no solid scientific evidence to show how this action would benefit the state. Please reconsider your plan and keep the water in the valley communities.

Thank you for your time,

-Tim Niblett
