Hey you people!  
Why are you imposing impossible further restrictions on our water usage? We have already done so much!

Have the areas where you live conserved as we have in the areas served by Cal-Am?

Do you wash your vegetables in a container and save the rinse water to water plants? I do.

Do you save the water in a bucket from your shower head while waiting for it to get warm? I do.

Do you catch shower water in a plastic wash pan as you shower to use to flush the toilet? I do.

Do you shampoo using the sink and sponge bathe instead of showering everyday? I do.

Do you do only two loads of clothes a week and even extend it to ten days or so? I do

Do you use your dishwasher? I don't.

So unless you are conserving as I am don't you dare impose further restrictions on me!

Cal-Am's water specialist came to my house and did a survey of all my faucets, toilets, and shower heads and checked for water leakage, etc and supplied and installed things to reduce even further my water usage. What a great program! And it was complimentary.

Further I don't care about trout and salmon going upstream and even less about all the people imposing their crap on me much to my detriment!

As a RN I know the importance of disease prevention and hand washing and cleanliness and with further water usage restrictions this will not be a priority. And with the swine flu threat this is very real!

Further I would like to see your water usage for each of you since January.

Thank You  
Carolina Bayne
