

To Whom It May Concern,

I am writing regarding water use in Monterey County, specifically the communities on the Monterey Peninsula. Over the years, this community accomplished great water savings to the point that there is not many more ways to cut water use. Compared to other parts of the state, I believe this area could be a showcase on how to save water.

Therefore, it is not fair to impose additional water cuts for this area. Doing so could severely impact the economy.

Thankyou
