I have purchased extra water credits and paid in good faith so that I may add, some day, a fourth bed-room to my home for a caregiver to provide me services in 5-10 years. The addition would be subject to all local permits. Of course.

I believe it unfair that I might not continue to have the use of my own residence as I age, and instead be forced to move elsewhere; especially when I have made a good faith payment under legal circumstances to obtain additional credits.

I also support the construction of a Desalinization Plant in the Moss Landing area to remove supply pressure on the regional community.
