

A photograph of a river flowing through a lush green forest. The river is surrounded by dense trees and vegetation. A large, dark blue, wavy graphic element is overlaid on the top right of the image.

WATER SUPPLY AND DEMAND MODELING IN THE NAVARRO RIVER WATERSHED

ANDERSON VALLEY COMMUNITY SERVICES DISTRICT OFFICE

14281 Highway 128 | Boonville, California 95415

Tuesday, October 1, 2024 | 12:30–1:30 pm

The State Water Board is developing water supply models that assess surface water availability in select watersheds. The models will help local communities better plan for and address water shortage conditions that may threaten water supplies, impair critical habitats, and create uncertainty for water users. Board staff will present information on the status of this work in the Navarro River watershed and be available to answer questions.
